Gasoline-Electric Car Takes Road for Alaska

Special from Monitor Bureau

Washington

A 60-FOOT gasoline-electric car,
a recent development in railroad transportation, is on its way
under its own power from the plant
in Philadelphia, where it was
manufactured to Seattle, where it
will be sent by steamer to Alaska
for service between Seward and
Fairbanks. The car will pull a 50foot trailer, according to the office
of the Alaskan Railroad, Department of the Interior, and will be
used in heavy tourist traffic in the
summer and to replace one of the
regular steam trains in winter.

ing impressive growth in number FINDS PRESIDENT

added that the President told him le liked these people and enjoyed "mixing among them."

Natives who have met Mr. Coolidge in the interviews he had opened are highly pleased with their New England President. He is not only proving unexpectedly cordial, but is doing little things they appreciate. His first invitations to dinner was extended spontaneously to a Yankton man who had not even anticipated seeing him at this time. The next morning, after at this time. The next morning, after giving an appointment to a Sioux Falls man who had not ventured to ask for one, he invited him to lunchcon, and arranged to have his car call so that he could take him out to the lodge himself.

Friends who have seen him nailing up an old shingle out of place or put-tering around the house at his Ver-mont birthplace in off-duty moments say he likes the homeyness of this quiet locality.

Looking back to the early days of

partment of Marketing and Rural legend of his silence was built up Organization of North Dakota Agriduring the period of his stock-taking cultural College, at Fargo, said the

First Week Among Home Felks In a friendly atmosphere where no special objectives find their goal he is as sociable and communicative as anybody, according to men who know him intimately. South Dakota's

brief contact appears to bear this out. These are the golden days of the President's vacation. The stream of eastern callers carrying porten-tous problems is doubtless even now gathering. The personages such as Gen. Leonard Wood from the Philippines and James R. Sheffield, Ambassador

to Mexico, are still at a distance, but on the schedule. Not a single dignitary from the outside world has samuel R. McKelvie, formerly Governor of Nebraska, who with Mrs. McKelvie was a guest over night at of the Council to have as many of the lodge, and Governor McKelvie, who knew Mr. Coolidge when the latter was Governor of Massachusetts, came here only incidentally with the Editorial Association's tour of Nebraska.

For his first week the President Avenue had so extikingly demissible to the control of the long sharp angle at the country of Nebraska.

For his first week, the President setts Avenue had so strikingly demands been among the home folks, and the has been home folks himself. He improvement that the Council prohas been among the home folks, and he has been home folks himself. He gives unmistakable proofs that he is delighted with his Black Hills

Neither William T. Tilden 2d, nor Francis T. Hunter, the two Americans in the men's singles, was due for further singles competition today, but they were to participate in the first round of the men's doubles late in the afternoon.

_____ Prisoners Win Liberty for Flood Labors

By the Associated Press Baton Rouge, La.

REMISSION of sentences ander the most liberal interpretation of the law will be the reward of several hundred prisoners at the state prison farm here, according to officials, for valuable work during

In many cases remission of sen-tence will amount to dismissal from the penitentiary as the time off in-cluded in the awards will amount to more than the remaining time to serve, H. C. Pitcher, general manager of the prison, said. The reward not only will extend to those actually engaged in work on the levees, but to the women who did their part behind the line.

RADICALS PLAN SHAMEEN DRIVE, CANTON HEARS

Prisoners - Nationalists Said to Take Tsingtao

SHANGHAI, June 22 (AP)-Uneasi-

shanghal, June 22 (P)—Uneasiness prevails at Canton, say reports reaching here today, because of rumors that Radicals are planning an attack on Shameen, the foreign quarfer, to liberate imprisoned comrades. Agitators are reported to be interfering with British steamers on their way to Hong Kong and to be cailing on farmers and laborers to assist in a drive on Shameen.

The important port of Tsingtao on Kiaochow Bay in the Province of Shantung has been occupied by a detachment of Nationalist troops, say the vernacular newspapers. This detachment, the reports said, entered the city by boat from Haichow, which they recently captured, and then proceeded along the railway toward Tsinanfu, the capital of the province.

The appears also report that the

EXPERTS STUDY POWERS' PLANS FOR REDUCTION

Tripartite Naval Conference Feeling the Ground for Common Agreement

DOMINION DELEGATES MEET MR. BRIDGEMAN

Singapore Base Question Is Not to Be Raised by Japanese Representatives

GENEVA, June 22 (A)-Hugh S. Gibson, chief American delegate, held a private conversation with held a private conversation with Admiral Viscount Saito and Viscount Ishii of Japan today on the problems raised by the big differences in the American, British and Japanese naval limitations projects.

W. C. Bridgeman, First Lord of the British Admiralty, found himself unable to attend this first private meeting because of a session of the

Attack Aimed to Liberate meeting because of a session of the dominion delegates, but he was to see Mr. Gibson during the afternoon and have a general talk.

The Japanese delegates told Mr. Gibson that it was difficult to discuss limitation of auxiliary naval vessels in terms of ratio, but assured him that Japan earnestly desired to

the first of the three American experts present, is director of the War Plans Division of the Navy Department, while Capt. Adolphus Andrews is commander of the submarine base at New London, Conn.

At the conclusion of the tech-

At the conclusion of the technicians' meeting, a communique was issued reading: "The technical committee established June 21 by resolu-

issued reading: "The technical committee established June 21 by resolution of the executive committee of the conference met today to exchange information with a view to elucidating in more detailed manner the respective proposals."

The representatives of the British Dominions at their meeting with Mr. Bridgeman discussed the general British attitude in light of the plans submitted to the conference. It is understood that Austral: and New Zealand are especially anxious that nothing be done here to weaken the growing strength of the Singapore naval base. Australia now is building two 10,000-ton cruisers, which can be repaired in Sydney harbor, but in view of its remoteness from the mother country, it desires the maintenance of Singapore as a protective base for the Australian fleet.

Admiral Salto told the Associated Press that he had no intention of raising the Singapore question, and Admiral Jellicoe has assured the press that the question of faval bases is not on the agenda of the present conference.

Beading.

position.

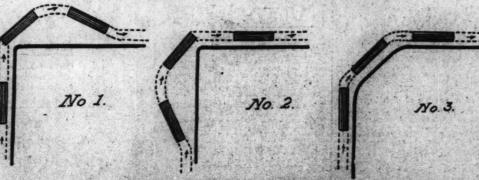

Great Britain's idea of reducing the size and armaments of capital ships and cruisers appear to be not at all to the liking of the Americans, and it is understood the delegates of the United States will make it clear that their country never will be forced into building small size cruisers, as they are unsuitable for its national defense needs.

Working Vocabulary Sought

Working Vocabulary Sought
For the next few days the main
task of the conference will be to
agree on definitions. While the projects of the three participating powers were all presented in the English
language, it is felt there is a difference of views as to what some of
the terms employed, particularly
technical ones, actually convey to all
the delegates. This business of finding a common working vocabulary
is not expected to take over long,
as the members of the technical committee are all seasoned naval men
who prefer blunt, unmistakable
terms to the nuances of diplomatic

An Excellent Way to Dent a Front Fender

gation's exact intent. It is the expressed wish of Mr. Gibson that all committees sessions shall be as elastic and informal as possible so as to satisfy everybody and hasten the work en the theses submitted.

In a statement to the Associated Press last night, Admiral Salto explained the plan of his country would enable the United States to scrap some of its numerous destroyers and make use of the tonnage, thus saved in the building of cruisers. In this way, he pointed out, American cruiser power could be raised to meet requirements.

Japan's Cruiser Strength

As for Japan, it desired to main-

Japan's Craiser Strength
As for Japan, it desired to maintain its strength in cruisers and wanted submarines without limit purely for the defense of its extensive coast lines.

The British proposal, it is emphasized by Admiral Earl Jellicoe and Vice Admiral Sir Frederick Field, is not a blow at the Washington Treaty, but constitutes an effort to accomplish at the present conference things which would have been settled at the second Washington conference in 1931.

Mr. Gibson refuses to abandon his smiling optimism, while Admiral

conference things which would have been settled at the second Washington conference in 1931.

Mr. Gibson refuses to abandon his smiling optimism, while Admiral Earl Jellicoe and Vice-Admiral Sir Frederick Field, receiving the correspondents, reiterated the British belief that the adoption of their plan would lighten the burden of the taxpayer. He earnestly contended that the British proposal was not a blow at the Washington treaty, but really embodies a commendable attempt to do things now which must be accomplished at the second Washington conference to be held in 1931.

As evidence of the confusion in the

told the press representatives that the Japanese plan would give the United States only 15 cruisers, as against 29 for Japan and 61 for Great Britain. Thus the British admiralty, as represented at Geneva, seems to be unaware of the Japanese intention, as disclosed to the Assoclated Press, to allow the United British delegation claims that its re-States to transfer destroyer strength ductions would give a more rigid into cruiser strength.

Admiral Field ridiculed the American or Japanese, can contention that fast merchant- and that the extension of life to the

caliber."

But this quick dismissal of the importance of swift merchantmen is not accepted by the Americans, who insist anew that the rBitish plan to reduce the size of cruisers would take the teeth out of the American which has more sea bases.

Japan Dislikes Ratio Question

Admiral Saito, at his interview with Mr. Gibson, made clear that it appears appeal to Americans. Japan wants to maintain her presen naval strength, as she believes this desirable for purposes of national

that no agreement was reached at the conference, but that the first in-terview resulted in clearing the air

for further discussions.

Despite the Japanese aversion for the fixation of a ratio, it is felt in cans protesting against the British some quarters here that the real description of an armed liner as a problem of establishing the comparative strength of the American cruiser and the difficulty of convert-

The Homestead' TOPSFIELD, MASS

GENEVA, June 22-The British admirals are gratified at the important declaration of Admiral Hilary Jones, chairman of the United

States Naval Board regarding submarines. The limit of the size of these craft, he declared, should be 1700 tons. In view of the fact that there was no limit in the first Amer-ican proposal, Admiral Jones's state-

As evidence of the confusion in the air concerning the exact meaning of the various projects, Admiral Field to do the press representatives that the Japanese plan would give the allowed under the American plan.

Limiting Auxiliary Vessels The British argument is that all auxiliary vessels should, according to their class, be limited, not only in size but in numbers, and the limitation to the tonnage of each

can contention that fast merchantmen like the Mauretania could be converted into powerful auxiliary cruisers under the British plan by mounting 6-inch guns. "Why," he said, "they would merely be eggshell targets for any type of modern cruiser armed with guns of equal caliber."

But this quick dismissel of the land, that the United States, with its need of raw materials, such as manganese, steel, tin and rubber, would result in great economies. The Americans, Admiral Jones and Admiral Long, maintain, on the other hand, that the United States, with its need of raw materials, such as manganese, steel, tin and rubber, would result in great economies. The hand, that the united States, with its need of raw materials, such as manganese, steel, tin and rubber, would

They are not prepared to accept any provisions which would prevent the United States allotting its ratio tonnage for cruisers as it thought best, so the British plan of dividing cruisers into two classes does not,

Merchant Ship Conversion The American delegation hold that it is no disadvantage to the nations defense. He intimated strongly the to be allowed to adopt a maximum hope that a solution could be found ship as the standard for its class, and they believe that behind the without bringing the question of ratio, which is distasteful to Japanese public opinion. The most reliable information is large merchant ships the more that no agreement was reached at readily into commerce destroyers.

On the question of the value of the conference, but that the first inmerchant ships equipped with six-inch guns, the two delegations hold widely different views, the Ameri-

cruiser and the difficulty of convert-ing it into an aircraft carrier.

enigmatical and so far have done little to meet the criticism that their plan for stabilizing conditions runs entirely counter to any scheme yet dvanced for an understanding.

Washington Issues List

of Auxiliary Craft Tonnage WASHINGTON, June 22-A revised list of the relative tonnage of auxomerset, 7.
Golden jubilee celebration, Royal Arnum, Grand Council of Massachusetts,
liks Hotel, 8.

Read public by the State Depart-

This list shows the United States as having-only 10 modern cruisers aggregating 75,000 tons, two under construction aggregating 20,000 tons and six authorized, aggregating 60,000 tons. In addition there are eight cruisers totaling 78,000 tons, but they are nearing the age limit of 20 years and there are 14 cruisers totaling 101,000 tons which are now 20 years old and therefore obsolete according to the terms of the Amer

ican proposal.

Great Britain is credited with 50 modern cruisers totaling 249,410 tons and 14 under construction totaling

Japan has 32 cruisers totaling 193,-465 tons and six under construction with a tonnage of 54,200.

In the destroyer class, the United States has 309 vessels with an aggregate of 357,668 tons, 171 of which, however are laid up in pavy yards however, are laid up in navy yards in Philadelphia and San Diego and 33 entirely out of commission. Great Britain has only 166 destroyers to-

taling 109,115 tons and Japan 108 destroyers totaling 122,570 tons.

Submarine Statistics
In submarines the United States has 124 vessels built and building aggregating 93,868 tons; Great Britain 70 submarines built and building, aggregating 93,868 tons, Great Britain 70 submarines, built and building, aggregating 93,868 tons, and Japan 78 submarines, totaling .71,236 tons.

These are a part of the statistics which are to be examined by a technical committee, according to a resolution adopted at the Geneva conference, of which the State Department has been advised.

"In this manuer the conference will be in position to start its deliberations on an agreed basis of fact," said the resolution cabled to the State Department.

The willingness of Japan to accept the status que of auxiliary craft seems to officials here to indicate that the real problem confronting the conference at Genave is the

will be in position to start its deliceration on an agreed basis of fact," and the resolution cabled to the State Department. The willingness of Japan to accept the status quo of auxiliary craft seems to officials here to indicate that the real problem confronting the conferess at Geneva is the settlement of the cruiser problem between the American and British delegates. It is researded as possible that Japanese might enter objection to the substitution of modern cruisers for old ones to the extent indicated by the American proposal. In general, however, confidence in a favorable outcome is expressed here.

Competitive building it astisfactory concitudious are deprecated. It would be opposed to the administration policy, and W. E. Borah (R.), Senator from Idaho, chairman of the Foreign Relations Committee, expressed the didney and the comming session of Congress. He thought the food situation and other domestic matters would be more important at this time than and the sire of their guns, dealed that in regard to the British proposal that capital ships and aircraft carriers be reduced in size, together with the stote of their guns, deale with the goard that capital ships and aircraft carriers be size of their guns, deale with the state of their guns, deale with the sould be forced the more important at this time than and the comming session of Congress.

He thought the food situation and one work than those experienced by Lindbergh and Chamberlinf, the great to the British proposal that capital ships and aircraft carriers be size of their guns, deale with the states of the carriers and the american such states will transmit to serve the sales where to collapse the states of the same purposes.

The America working wave reserved to send out an emergency cancel.

The misters and very leave to collapse that carriers and the carriers pulle and the original carriers and the strength of the farm that carriers and the carriers and to committee, the food substitution of modern and the substitution of the same same and th

ment was dealt with in the Washing-ton Treaty, to which France and Italy were signatories, it is pointed

America's Heaviest Destroyer

As the largest American destroyer is only 1215 tons the proposal to limit destroyers to 1750 tons does not affect the United States. In the matter of submarines the United States has only five which exceed the 1600 tons proposed as a maximum.

On behalf of the American Gov-

ernment it has been emphasized that any move to disturb the Washington

Commander Byrd Is Prepared to Report Flight's Progress

Special Radio Sets Expected to Keep Fliers in Constant Touch With World-Every Effort Made to Put Ocean Hop on Safe, Practical Basis

are not going out into the uncertain

putting a large amount of money into a naval program.

American officials feel that in regard to the British proposal that capital ships and aircraft carriers be reduced in size, together with the size of their guns, deals with a matter that cannot be dealt with at a three-power conference. The size of their capital ships and their armament was dealt with in the Washingnine-cylinder motors are of the same type that carried Byrd over the North Pole; they were used by Cap-tain Wilkins in his recent explora-tions; and their value for trans-atlantic flying has already been proved by both Lindbergh and Cham-berlin. No more dependable engine has yet been built; but it is still an engine and not infallible.

an engine and not infallible Should one of the America's en-gines fail in the first half of the journey, there is not an expert in the United States who can say whether the remaining two engines would pull the enormous weight of the machine and her load of equip-ment and men. In tests with normal loads and in moderate weather two any move to disturb the Washington pact would be opposed, since the present conference was called for the sole purpose of carrying through the original Hughes naval limitation program by applying the terms of the Washington pact to auxiliary naval craft.

Other solutions fithe Patitic courts.

purpose. The center motor can be reached from the forward cockpit, Question in Parliament

LONDON, June 22 (P)—Great
Britain's delegates to the tri-partite noval conference at Geneva have

Possibility of Storms Provided the three motors function perfectly, there is little to be con-cerned about. The greatest danger, as Lindbergh has pointed out, is the possibility of running into a sleet The American delegation entirely repudiated the idea and they were not ready to listen to any reasoned statements regarding the security requirements of the British and Japanese.

Behind all these criticisms being exchanged at the outset of the consideration of the consideration of the consideration of the British delegation, had a free hand to negotiate with the other powers concerned. Sir Austen said that the British delegates would act exchanged at the outset of the consideration of the British delegates would act exchanged at the outset of the consideration of the British delegates would act exchanged at the outset of the consideration of the British delegates would act exchanged at the outset of the consideration of the British delegates would act exchanged at the outset of the consideration of the British delegates would act exchanged at the outset of the British delegates would act exchanged at the outset of the British delegates would act the machine down. Colonel Lindbergh has suggested a heating approved by the Government.

The American delegation entirely storm. Once such a storm. Once such a storm. Once such a storm. Once such as storm.

good will and desire for a final agreement. The Japanese are still very WEATHER PREDICTIONS as yet.

But how will the world know if the America is forced down? There is every reason to believe that Commander Byrd will be in constant touch with the world throughout the flight. The radio equipment of the America is said to be the most co plete ever installed on a heavier-than-air craft, and should enable the crew not only to send word of their fortune back to America, but to receive communications from the United States, Europe and ships at

LORDS' REFORM PLAN INDORSED

Upholds British Government's Proposals

By Wireless from Monitor Bureau via Postal Telegraph from Halifax LONDON, June 22-A secret conference representing 150 peers and additional proxies indorsed the Government's lords' reform proposals. This strengthens the Cabinet's hands, as it was doubted up to last night how the second chamber's rank and file would regard the plan which includes semoving the much-prized hereditary privileges from more than half their number. So urgent is felt the need for providing an effectual revisionary body in the British Legislatures, however, that this consideration is now not ex pected to become a serious factor in

the situation. Several points in the Government's draft, however, are criticized and may have to be modified. There is opposition in Conservative circles, for example, to the proposal that who are not elected to the reduced house shall be allowed to enter the House of Commons, since this would enable them to choose it which house they will serve, though the members of the Commons have

no corresponding privilege.

It is also gravely doubted whether will be possible to defend the

curtail the lords' powers.

The Opposition believes the measure offers it a great electioneering opportunity, of which it is prepar-

RURAL EDUCATON **NEEDED FOR PUNJAB**

College Men Urged to Return to Country

BOMBAY (Special Correspondnce)-"The complaint that our universities and colleges draw from the ountryside its best initiative and alent, should be rectified by arrangto return to enrich the villages clared Sardar Jogendra Singh, Min-ister for Agriculture, Punjab, pre-siding over the Sikh Educational Conference at Rawalpindi. "We must," he said, "instill in the minds of our young men, a respect for labor and lead them to realize that they are living in a century when invention has lightened labor, and when it is essential that they should know how to use their hands and eyes as well as their brains."

The speaker urged the Sikhs to utilize the government village schools. The first line of advance, he suggested, was to have Gurdware

schools. The first line of advance, he suggested, was to have Gurdware (religious institutions) in every village and to organize the village community councils to watch the education of children and to compel their attendance. The second line of advance was to organize vocational education, including dairying, poultry-keeping, and making of marketable articles.

Out of 1,000,000 boys in the Punjab schools about 100,000 were Sikhs and out of nearly 500,000 girls attending colleges and schools about 13,000 were Sikhs. Concluding, Sardar Jogendra Singh observed: "I am full of hope for my community and my country, but we must grow in practical sense and stronger discipline and learn to make something of the arts of peace, realizing that we can build no altar to nationhood on false pride and mordant criticism." Secret Conference of Peers cism." on false pride and mordant criti

WOULD GET RID OF PRISON CELLS

Confinement Methods Are Declared Ineffective and Harmful to Prisoners

THE HAGUE (Special Correspon ence)-An urgent appeal for the sholishing of the system of priso cells in general, and for the allowing of equal rights for men and wome prisoners was voiced at a recent public meeting of the "Anti-call Committee for Women." Dr. W. Francken of The Hague

Dr. W. Francken of The Hague stated that the system of confinement in cells in Holland had proved a great failure. It had no regard for the individual requirements of those confined. Moreover, as a rule, its duration exceeded humanitarian demands. Although some improvements have been introduced by the penitentiary authorities there is much more to be done.

A change in the appointment of the committees supervising prisons, the so called colleges of regents and also a more systematic care of exprisoners was advocated. At the same time Dr. Francken did not approve of too many regulations, which but hamper the individual care of the inhabitants of the penitentiaries.

Dr. Francken said that it was but

Dr. Francken said that it was but right that women should be taught a handicraft when in prison, and that they should have access to the openair prison; two privileges which until now were not available to them.

New Car Details Said to Be Incomplete—Further Data Given by News Agency

NEW YORK-A statement issued on behalf of Edsel Ford says: "I have fust had brought to my attention a statement issued by a news bureau purporting to give the details of design and equipment of the new model Ford automobile. Any statement of this sort at this time is unauthorized and apt to be misleading.

"No statement as to the details of w cars has been made by the Ford Motor Company and none can be made at this time. As a matter of actual fact, the specifications for the new models are not yet complete and it would be impossible for any one, even in the Ford organization to discuss them with accuracy and with authority."

Adoption of Steel Pistons Referred to as Discarding

Precedent in New Ford Cars. DETROIT-The new line of Ford cars, the principal specifications of which were published exclusively by the Financial News, Tuesday, will be on exhibition at various Ford show rooms in the near future, and since it will take a substantial portion of the company's initial output to supply demonstration car needs of all its dealers and distributors actual retail deliveries probably will not begin for a week or two after the first showing of the line.

In the forthcoming announcemen which has been prepared and signed by the Ford Motor Company some interesting statements are made

with reference to new line.
"The new Ford car," the announcement will say, "is made to stand up
under thousands of miles of steady running over all kinds of roads. It has even more stamina than the Model T Ford, because we have

model I rord, because we have lave learned to make every part stroager and sturdier without increasing weight or greatly increasing c.jst.
"Many of the Model T Fords are still in active service after 75,000, 100,000, and 150,000 miles. This new Ford will do even better in the Ford will do even better. In the words of Henry Ford, 'It is my ambition to have every piece of machinery nonconsumable and the product that I turn out so strong and so well made that no one ought to ever have to buy a second one."

The population of the prairie between the lodge and the executive office is locally estimated at less than one to the square mile. The hill territory around the lodge, ex-

OLDS MOTOR WORKS, Lansing, Mich.

Both Electric and Gas Method Better Than Riveting, It Is Declared

Special from Monitor Bureau NEW YORK—As a result of a con-erence of engineers here it has been greed that noisy riveting on sky-crapers can be dispensed with by substitution of gas or electric weld-

ing processes.

Two groups of engineers, one sup-Two groups of engineers, one supporting the gas and the other the electric method, declared that either is as effective as the present noisy method, and urged that legislation be enacted to settle the noise question, as suggested by Dr. Louis I. Harris, Commissioner of Health, in whose office the conference was held.

One engineer said that where it was necessary to use rivets they should be applied in the factories, using the welding processes on the construction work. Those favoring electric welding were in the majority, however, but both groups said

ity, however, but both groups said they would supply a list of buildings which have been erected here and

elsewhere by welding.

The electric welding process consists of fusing metal joints by an electric arc; in the gas method acety-James H. Edwards, vice-president of the American Welding Society, said he had no hesitation in asserting that buildings of considerable size can be assembled by the welding process, and J. M. Curtain, vice-president of the National Electric Manufacturers' Association, was equally sure that the welding process was sound. Edmund A. Doyle, representing the

gas welders, also agreed that the welding technique is as effective, if not superior, to the riveting method. Attention was called to the fact that there are questions of trade union differences to be considered and that not all contractors are equipped to handle the electric or gas processes. At the conclusion of the confer-ence, Dr. Harris said the opinion of the technical experts showed that the practical value of welding and its

afety in construction are no longer natters of speculation or experiment. CHICAGO KEEPING LEAD IN AIRPORT EXTENSION

Special from Monitor Bureau CHICAGO, June 22-When Col. Charles A. Lindburgh comes to Chi-cago he will be advised of facts and compiled recently by the new

vey indicates that Chicago has more municipal airports than any other city whose record is known, that more miles of regularly scheduled airplane mail and other commercial routes center here, and that almost any time new work may begin on a projected \$5,000,000 public airport

projected \$5,000,000 public airport on the lake front.

This was learned in an interview with Thomas Wolfe, director of the department. Promoters of commercial aviation anticipate early passage in the Illinois State Legislature of a bill in the House of Representatives to authorize park boards to build and maintain airports and of a bill in the Senate granting enabling legislation to allow Chicago to levy a one-haif-mill tax for 10 years for airports, Mr. Wolfe stated.

AIR CAVALCADE HAS 23 ENTRIES

Twenty-three entries have been made for the third national air tour of aproximately 4000 miles which will leave the Ford Airport June 27. Twenty-three cities will be included in the most ambitious program and itinerary that has ever been attempted with commercial aircraft,

tempted with commercial aircraft, according to the sponsors.

The route will extend from Detroit across Canadian soil to Buffalo on the first day. On June 28 Geneva and Schenectady. N. Y., will be visited with arrival in Boston, Mass., the following day and departure the morning of June 30 for New York City. Philadelphia and Baltimore City. Philadelphia and Baltimore are scheduled for July I with arrival In the formula of the first and vegetable products of the function.

New of FREEMASONRY

Special from Monitor Bureau

London CCORDING to the Punjab Mathe district of the Punjab, under the Grand Lodge of England, has decreased during 12 months from 2533 not be in consonance with the gen-to 2351, of whom 191 belong to more eral tenets of the craft. One such than one lodge, leaving a net total of 2145 subscribing members. This decrease has occurred almost, if not entirely, through the transfer of military units from the district. It is, however, claimed, and rightly so, that Freemasonry is a living and abiding force in the jurisdiction. Every year all the lodges are inspected officially and the reports received show that the progress generally is satisfactory and that a good Masonic spirit pre-

At Delhi an association, known as the Masonic Fraternity, has been formed which, it is hoped, will result, at no distant date, in the erection of a new Masonic temple there. The two local institutions there are the Punjab Masonic Institutions (in two sections). The first section, founded in 1871, is for the purpose of maintaining and educating in a suitable manner the children of Freemasons needing assistance. In 1915 a sep-arate foundation was formed for the relief of the women dependents of Freemasons in indigent circum-stances. Then there is the Dr. Owen hursary fund, inaugurated in 192, at the instance of Dr. C. A. Owen, deputy district grand master, for the purpose of providing for the higher aducation of Freemasons children beneficiaries of the Punjab Masonic Institutions, if they pass the age at which their connection with the institution must ordinarily cease. Two of the beneficiaries of this fund are now at universities in England.

When Lord Somers was installed as Grand Master of Victoria a short as Grand Master of Victoria a snort while since it was stated that the membership of the jurisdiction, at the end of the previous December, stood at 44.793, an increase during the preceding year of 2703. In that period 20 new lodges had been consecrated and 12 new temples in counsertated and 12 new temples in counsertated and 12 new temples in counsertated of the property of the state of the try towns dedicated. During the six years ending Dec. 31, the member-ship had been nearly doubled, while re than 190 Masonic temples were in occupation.

+ + + Class lodges—that is lodges whose membership consists of those engaged in any particular trade or progaged in any particular trade or pro-fession, or of membership of any 1928, but whether he will succeed is a debatable question. A year or not supposed to be regarded with two ago the Grand Lodge held one of favor by the authorities of the Grand Lodge of England. As a matter of but the result was not an unqualifact, however, they have proved field success.

among the most successful of all the lodges on the register. The feeling was that at the after proceedings of sonic Year Book, the total assembled at the dinner table, dismembership of Freemasons in cussions might arise when there might not be unanimity of opinion. lodge, which has certainly been very successful throughout its career, the anniversary. The name chosen was undoubtedly an appropriate one, since the founders were all connected with the London Coal Exservice to the craft and have main-

> Another lodge, formed almost entirely of members of the Jewish faith, named the Hercules, has just celebrated its first anniversary. If it continues to act during the coming years as it has acted during the first year of its existence, it will certainly merit the name chosen, which de-notes strength. It subscribed 500 guineas, nearly £100 more than any other lodge, to the Royal Masonic Benevolent Institution and at the last meeting it collected 200 guineas toward the funds of a Jewish institution. These are not its only benefactions during the year but, coming from a lodge which has a membership of only 28, these contributions are certainly noteworthy

The grand festival of the United Grand Lodge of England this year has been held under circumstances Ampthill, was able to be present, the former being away in the south of France and the latter being in South America. Lord Cornwallis, the Deputy Grand Master, had, therefore, Deputy Grand Master, had, therefore, the honor of presiding, for the first time since his appointment to the office, at the Grand Festival of last year. The principal item in the program was the appointment of the new grand officers, the most important appointment, that of Grand Senior Warden, being given to Lord Forester, who has succeeded Lord Lascelles. The latter, who has become Provincial Grand Master for West Yorkshire, is endeavoring to persuade the Grand Lodge to meet somewhere in his province at one of the quarterly communications in 1928, but whether he will succeed

In Both Places, Close to City's Business Center and Considered an Essential Part of General Harbor Development

Berkeley, Calif. ROM among almost \$8,000,000 planned or under construction six western cities of the United es, two stand out with peculiar ness. These are the projects of fording easy means of reaching the business district, while the third side of the fill touches Atlantic Avenue, the main automobile high-San Diego, where only a small por-tion of a large fill has been made as a start on the work, and of Port-land, Ore., where the labor is near way to the northern part of Cal-ifornia. Electric lines and railroad spur tracks are within a block of the district.

First, both cities are developing air-ports as purely commercial affairs, without any reference to the mili-tary uses of aircraft which up to the present have kept aviation largely in the public eye. Second, both consider their airports part of a general harbor development, as much an adjunct of the city's communication facilities as its docks and wharves. Third the actual construction of the Third, the actual construction of the two airports is part of a scheme for improving the harbors of the communities. Fourth, both propose to devote highly valuable land, quite near the business center, to aerial uses. Also, each city expects its airport to be a focus for an aviation industry.

Financially, the airport of Portland is the larger project, involving expenditures approximating \$1,250,7000. The San Diego scheme involves an estimated expenditure of \$80,000. Third, the actual construction of the

an estimated expenditure of \$80,000. Either thus is among the largest airport plans which have been advanced anywhere in the United

But for the construction of these airports as incidents to general har-bor development the costs would be, of course, much higher. Perhaps, too, completion of the two plans would have been less certain, for the public is proverbially reluctant to vote bonds for improvements even when those improvements are admittedly good public investments. By developing their airports as parts of general harbor schemes, however, this reluctance is over-come, since all marine communities are well aware of the need for docks and wharves and deep channels and it is comparatively easy to obtain small additional sums—that is, small in comparison to harbor bond issues—to provide for the air dock-age facilities.

Constructed by Port Commission This applies more to San Diego than to Portland, where the airportis being constructed by the Port of Portland commission out of portland, and not by any direct tax or through any bonds voted by the public. There the commission is proceeding on the assumption that a port is a port, whether for sea travel or air travel, and that it is as much the duty of the port authority to the duty of the port authority to provide facilities for aircraft to land as it is to provide dockage for sea service to its community, he de-

In doing this, the commission has

This island will afford a landing space 1220 by 6000 feet, the greater dimension being parallel with the direction of the prevailing winds. A causeway, to be filled in for connecting this area with the mainland, will be professor Benton submitted figures.

Professor Benton submitted figures here on June 28. Eleven hundred delegates from 30 nations will be present.

Sir Arthur says the document gether on the character and standing of the men who are in charge of it."

Professor Benton submitted figures permit an additional runway to be It at an agle of 45 degrees with the axis of the island. This will have a length of approximately 5000 feet. Thus two runways, the longer on the island and the shorter on the cause-way, can be built, which will afford adequate space for landing and tak-ing off directly into any winds ever experienced in the Portland district. Whether the runways shall be sur-faced or merely turfed is as yet a

subject of consideration. In rebuilding the island with dredge-spoil care taken to make the upper two feet of a soil on which turf would grow readily. At the same time, a slight incline was given the island so that it will be well drained under all conditions

Its position in the river gives this airport a degree of visibility not pos-sessed by mainland fields, as the sessed by mainiand heids, as the island shows an appreciably different color during a fog from the surrounding water, thus enabling pilots to find it easily.

James H. Polhemus, chief engineer

of the port commission, said of the airport: "We intend to develop this in accordance with the best engi-neering data and advice obtainable. We have not made a close estimate of the cost but are prepared to do everything necessary to make the field a modern one in every particu-

San Diego's Thoroughgoing Plan San Diego's plan has been com-leted down to the last detail, a pleted down to the last detail, a thing which assures that all development work will tend toward per-fection of the scheme and that nothing will be done which must be re-done at a later date. The plan itself meets the highest requirements of the Department of Commerce, which Congress now has placed in charge of all civil aviation

Basically, it is a filled in area on the harbor edge, approximately a mile from the business center of the city, on what now is shoal land or tidal flats. The filling of this or some other area is a necessity in connection with plans for constructing a 40-foot turning basin in the harbor, as the dredge-spoil from this work must be deposited somewhere. Part of the fill has already been con-

structed.

This field will have an area of about 420 acres, of which a 3000 foot circular space will be the landing field proper, some 60 acres will be available for lease to manufacturers of aircraft and their accessories and the remainder will be devoted to the necessary buildings, including hangars and to open space for the servicing of planes.

Along one side of the triangle the fill is to occupy will be deep water,

found. This makes for a very high factor of safety at this field, since it is in lack of adequate space at the take-off or landing that most ac-cidents find their source.

The fill is to be surfaced, if pos-The fill is to be surfaced, it possible, with a peculiar type of soil brought down by the San Diego River, not far distant. This soil has the peculiar property of not getting dusty in dry weather nor boggy in wet. Whether a sufficient quantity of it can be obtained readily or whether it can be produced artificially still affording opportunity for the handling of seaplanes. "Harbor Drive," looking to artificial production of which is to encircle the harbor under plans for development of that civic asset, will-run along this side of the field, giving ready access to the industrial district. Along another side will be Laurel Street, affording easy means of reaching the of this field is instort two sides, that

of this field is that on two sides, that the north, there never can be any buildings or other obstructions erected, while on the third, toward the mainland, there must always re main a strip of land where no high structures can be set up. This is assured by the presence there of railroads, electric line and highways. Just north of the fill area is a large section owned by the Government and set aside for aviation.

This, with the 3000 foot circular factories expected to spring up

CANDOR URGED IN FINANCIAL DISCUSSIONS

Boston Rotarians Hear Monetary Expert on Federal Reserve

Advocating greater candor in the discussion of financial questions, tor of the Stable Money Association, detailed to the Boston Rotary Club developed into the Federal Reserve System which he characterized as the "crowning apex." In his talk Mr. Lombard brought out the fact that the aim of students of monetary subjects and economic statesmen is the stabilization of the purchasing power of stable than the discussion of force that the aim of the purchasing power of stable than the discussion of force that the aim of the purchasing power of stable than the discussion of force that the aim of the purchasing power of stable than the discussion of the purchasing power of stable than the discussion of the purchasing power of stable than the discussion of the purchasing power of stable than the discussion of the purchasing power of stable than the discussion of stable than the algorithm than the discussion of stable than the stable than the discussion of stable than the stable than the discussion of the purchasing power of still another, there are bolding ban-quets, dinners, or luncheons, and a few have planned more varied activities. Ten of these, whose numerals the stable that the aim of students of monetary subjects and economic statesmen is the stable than the discussion of the purchasing power of still another, sartorically at least, were Pilgrims. Welcomed in Satire

The lys Orator, Geoffrey McNair Gates, was presented, and he, in heavy satire, explained his presence, greeted the assembled multitude that filled the horseshoe end of the Stadium with "friends, friends and you unfortunates who are neither—welcome," and then pro-

"Everyone is interested in what money will buy and in policies which will result in giving money a stable and constant purchasing power," Mr. Lombard said. "Fluctuations in the purchasing power of money as measured by fluctuations in general price levels are productive of social and economic evils of far-reaching importance. General price levels can be stabilized by effectively controlling the volume of money in cir-culation and in use. When the price level rises, that is an indication that there is inflation or too much money; and when the price level falls, that is an indication that there

is deflation or too little money.
"Under present conditions superabundant gold reserves the ef-fective power to control the money volume lies in the hands of the thorities of the Federal Reserve System, which through its powers of buying and selling securities, alter-ing the rediscount rates, circulating gold certificates and otherwise, can very appreciably and with very salu-tary results guide the credit policy of the country and produce a con-dition of stability. Stability in the United States tends toward stability throughout the world because the world today practically looks upon the United States as its central bank

when you sell me cotton, I am selling you money. Obviously the price of that cotton is affected by the supply of and the demand for cotton. It is equally true, but not quite so obvious, that the price of that cotton is affected also by the supply of and the demand for money. stabilization effort, its powers in-creased, its prestige extended, its

To End Fluctuation In an interview following his address, Mr. Lombard said that the Stable Money Association was 'A dollar is by law a given weight.

of a certain degree of fineness of one precious metal," he declared. "However, no man is interested in receiving a certain weight of that precious metal except perhaps the jeweler. But every man is vitally interested in what the dollar will

"Bryan was criticized in 1896 because he was alleged to want a fifty-cent dollar. Yet, compared, with 1896, 1920 was a 26-cent dollar and the 1926 dollar a 39-cent dollar. Sta-bilization must not be a matter of chance. We must not stop at the chance. We must not stop at the first beginnings, but go on laying plans for the future, perfecting methods and spreading knowledge of its effects and how it can be obtained. We want permanent, scientific, assured stabilization."

FIRE CHIEFS HEAR GOVERNOR BREWSTER

Executive Says New England Needs "Third Alarm"

PORTLAND, Me., June 22 (A)-What New England needs is a "third lantic City recently. alarm" to awaken it, Gov. Ralph O. Brewster told the members of the nual convention while welcoming

eral communities," said Governor Brewster, "can do a great deal toward making New England ready to
achieve the things it should. You and
every citizen should become instilled

money rather than the discussion of foreign exchange, interest rates, gold reserve ratios or the metal used as the base.

The class of 1887, celebrating its fortieth anniversary assembled for luncheon at the Hotel Somerset and afterward went to the ball game in a body. They, too, plan to hold their class dinner at the Union Club tonight.

> The Thirty-Year Class The class of 1897 motored to the

The class of 1897 motored to the Brookline Country Club this morning and returned in time for the game this afternoon. The members of the class will dine at the Boston Chamber of Commerce, while their wives will be the guests of Mrs. N. Penrose Hellowell at her home. Penrose Hallowell at her home on Brush Hill Road, Milton. The Har-vard 1902s, with their families, will be entertained at luncheon by Mr. and Mrs. Guy Bancroft, Ware Street,

But the most general interest of the day centers around the game of this afternoon. Yesterday's battle was held at New Haven before a colorful commencement week throng, Harvard winning, 10-6, after being

behind for six innings.
Soldiers Field yesterday afternoon was the scene of perhaps the most colorful event of Harvard's entire colorful event of Harvard's entire school year. Led by a band and by a crimson banner bearing the num-erals 1865, carried by two of the members of that class, and followed by the other alumni in the order of their seniority, the parade marched

The pause in Harvard's commencement week between yesterday's confetti covered class day and tomorrow's presentation of diplomas is filled today with numerous class reunions and with the second baseball game between Harvard and Yale.

Twenty-two of the classes that have returned to the seenes of their regular straws. The members of '21 wore brilliant green Chinese costumes, complete even to the point members from in China. Another class emulated firemen in their attire, and members of still another, there returned to the seenes of their returned to the seenes of their second members of still another.

ceeded, as he said, to talk about

Afterward there were cheers, and then "Fair Harvard" was sung by thousands of voices. After a moment of premeditated silence when the last note had floated away the signal was given, and the confetti battle was on. It was as though the stadium had burst suddenly and beautifully into into little tissue paper balls that burst as they were thrown into the air rose from every seat. Sparkling in the sunlight it sprinkled down, covering the hats and gowns of the women, forming epaulets of color on the shoulders of the men, and laying the gray sides of the stadium with

brilliant tapestry.

Little rolls of blue and yellow and the upper tiers, falling across the invisible wires that had been stretched above them, and forming a cobweb roof as beautiful as the carpet be-

And after dark this pageantry of color was resumed in the Harvard Yard. Thousands of colored lanterns were strung among the trees, and lights were trained upon the white fountains that had been erected there. At 11 o'clock the lights were turned off and simultaneously the music of the dance in Memorial Hall into the stadium.

The class of 1902 wore orange and black hat bands, blue coats and white minety-first year was over.

of deposit." "When you sell me cotton, I am DARK EGYPTIAN SCHOOL BUDGET ERA LIGHTENED

Salary List Bears Burden of Reduction—Answers Mayor's Appeal

As passed by the Boston School Committee meeting last night at headquarters, the budget for the year amounts to \$14.662,793.05. is \$200,000 less than was asked for in the first budget.

The reduction is the committee's response to the request of Mayor Nichols that \$500,000 be deducted in the interest of the taxpayers. The sum was taken from the item of \$4,-677,562 allowed for salaries for in supervising staff and others. It does not make a reduction in salaries Normally, the money for increases and other items would be taken from year as a margin of safety. Last year this margin was \$600,000 and it was this sum carried over annually that Mayor Nichols wished to wipe

Dr. Bogan States Stand Those voting for the budget were Dr. Frederick L. Bogan chairman, Mrs. Jennie Loitman Barron, Francis C. Gray and Edward M. Sullivan William G. O'Hare voted against it.
The budget was sent to Mayor
Nichols today for his signature.
"I am still firmly of the opinion," riginally together and the registerriginally presented should be
adopted and that no sum should remain unappropriated. In order that
the schools may be open for our
children during the remainder of
the present financial year, I reluctantly yield and vote for the hudget,
leaving unappropriated \$200,000 of
the amount which may be raised by
law for maintenance of schools."
Failure of the Schoolhouse Commission to discover the nature of
the soil on Mahler Road, West
Roxbury, was given by the committee as the reason for an additional
appropriation of \$60,000 for the
schoolhouse being erected there.

Committee Explains Action
In passing the appropriation the

In passing the appropriation the members of the school committee authorized the following statement:
"It seems to the school committee that reasonably adequate knowledge of the condition of the land as selected by the school house commission should have been in the possession of the commission before the taking was completed. Had this been done, there would be now no need of additional appropriation because the contract would not have been awarded until decision was reached, as to the suitability of the soil.

"There are now but two alternacommission, or provide the addi-tional \$60,000, to permit the driving of piles and the immediate progress in the erection of the buildings. The board of apportionment reports that there is now no other suitable, avail-able site in that section of West tee reluctantly agrees to this addi-tional appropriation."

HAWAII OFFERS BIG PRIZE FOR PACIFIC FLIGHT

Preparations Hastened to Receive Contestants-Race Opens Aug. 15

HILO, Hawaii (Special Correspondence)-With two successful flights cross the Atlantic to Europe now a matter of history, the attention of those interested in aviation has turned to the Pacific, and Honolulu and Hawaii have come into the limelight. Almost as soon as word of the completion of the trans-Atlanic trips was received here, James D. Cole, member of the Honolulu chapter of the National Aeronautic Association. the National Aeronautic Association, offered two prizes for a flight to Hawaii from the mainland, one of \$25,000 for the first, and \$10,000 for the second. Local residents are already visioning Hawaii as the "air crossroads of the Pacific.

Two Hawaii aviators, Martin Jen sen of the Lewis Tours Company who operates a Ryan plane similar to the one used by Colonel Lindbergh, and H. M. Lemcke of the Honolulu Aviation Company, have already entered the contest. Mr. Jensen has sailed for California where he will nurchase a Ryan where he will purchase a Ryan machine for the flight he contem-

Mr. Dole has set Aug. 15 as the start of the contest; in order to give Col. Lindbergh a chance to compete. It is expected that at least 12 and perhaps 20 machines will be entered in this race. Among those who have will enter are Claire K. Vance and E. L. Smith of San Francisco, Lieut. John Johnston of San pose, and the wood that they are contemplating the race, among them without difficulty, but the destruction of the vault within the old building was a far different story.

The alumnæ procession is in the charge of Miss Margaret Grimshaw of Somerville. Miss Constance E. Hall of Cambridge is guest usher, Mrs. Arthur B. Porter of West Roxbury and Mrs. Kenneth S. testants.

The success of the recent flights has created a tremendous interest in aviation in the islands. At the last Legislature a territorial aero-nautical commission, with Col. P. M. Smoot, adjutant-general of the Territory, as chairman, was named and an appropriation of \$125,000 authorized for the development of airports. Work on these, which includes the John Rogers Field on Oahu, and fields on Kauai, Maui and Manufully of the state o

The John Rogers Field on the Island of Oahu will be one of the finest in the United States. Other fields on Oahu, in addition to the ex-cellent army and navy grounds, will be ready by Aug. 15. On the Island of Hawaii three excellent fields are being completed, one near Hilo, one at Hawi, and one in the very heart of the Hawaii National Park, on the alopes of Mauna Loa. This last is a natural field, and can be used with-out further clearing. Maul already has an ideal field at Walluku, and the Kauai Field will be in readiness. Inter-Island Air Service

Inter-island air service is already an accomplished fact, and although no definite schedule is maintained, Of Cambridge, Mass. no dennite schedule is maintained, Laude Graduate at Radeliffe and Lewis planes are transporting passengers from Oahu to Maui and Hawaii. Regular mail and passenger service is expected as soon as Mr. IOR AMERICAN
MECHANICS ELECT
Jensen returns from the mainland with another plane. Hawaii has an active chapter of the National Aeronautical Association, which will act as host for the fliers in the coming

John Smith Rolled From Coast to Lakes

By a Staff Correspondent
San Francisco
TOHN SMITH left this city for Chicago recently on the Over-land Limited, but he didn't ride. He just rolled and rolled and rolled for 63 hours, for he is one of 56 new Pullman cars recently placed in transcontinental service, jointly valued at \$2,800,000.

John Smith is not an exponent of the plainness indicated by his name. Railroad men and travelers Zodorath, Mogollon nor Coscasco-cetes are mor: resplendently be-decked than is John Smith in the latest accourrements of travel luxury. John Smith is also thought to be the possible forerunner of Main Street influences in the mystic realms where Pullmans are

Bank Vault Razed After Much Effort

Three Months Required to Demolish Mighty Two-Story Safe

Special from Monitor Bureau NEW YORK—The processes and means for demolition due to the con-

der struggled with the mass of re-inforced concrete, iron bars and steel plates which had been united to form the vault which in its day had sateguarded hundreds of mil-lions of dollars in wealth. The vault was of the type known as a composite safe, two stories in height, with heavy reinforced walls, outside plates of non-burnable metal an-chored with bolts, and with interior

It required three weeks to remove the 34-ton doors of 30-inch thickness. The walls of masonry were next attacked. After four more weeks of unremitting effort the roof was finally dislodged. This made it possible to install two 500-ton hy-draulic jacks inside the vault and to force the walls apart by vast internal pressure. But this work was will be Commander MacMillan; Ralph accomplished only after five weeks' Robinson, mate, who has made five endeavor. It took another week to complete the entire job of removal.

Phones: Henmore 0480 0491 Towns Raise Taxes 50 Per Cent to Improve Schools-Better Seed and Stock Sought

By a Staff Correspondent

LITTLE ROCK, Ark.—More than half of Arkansas' flood-swept towns have voted to raise their school tax 50 per cent, since the flood and so have a number of the overflowed rural districts. That tells the story of Arkansas' answer to the flood With some of its lands inundated a second and even a third time this year, agricultural Arkansas has had an unusually rough time, but its not discouraged. It is digging in and hoping the way will open for a quick come-back.

"It is most hopeful the way people are going back to recoup their losses," said H. C. Couch, chairman of the Arkansas Flood Commission. T. Roy Reid, state agricultural flood worker, declared, "There is lots of hope. I have never seen people go at a problem like this."

The Negro tenant is coming to the front. He is a very important factor in the re-establishment of agriculture, for in some sections of the flooded area he does practically all the farm work. Mr. Couch noted the extra effort among tenants. "I have seen colored people out plowing and planting Saturday afternoons and on Sundays," he said. "That is very unusual."

White independent farmers here than in Mississippi. Some of the Negroes own their own farms.

"Our losses are very heavy. We our know; their own farms.

"Our losses are very heavy. We over know; and the reports may not show the erport may not show the actual need for the entire rehabilitation situation. Some lands are still tinder water and on others the water is still coming up.

"The greatest amount of our help will have to come through credit winder water and on others the water of our people has some resources the rough which they can receive for cotton," he explained. "They had not gotton, he explained. "The bankers of the banker could not afford to take the land, and let the owner stay there as the best man to handle it. That was a very general condition. The low prices of last year did not help.

Chiekens and Pigs Sought.

"With what the Red Cross does and the intermediate credit bank we said."

"That is very unusual."

Negro Happy in Work "Let the Negro get to following a plow, and he'll whistle and sing," said Mr. Reid, "He'll work, too, They don't observe any eight-hour days. When the sun is shining, and they get out to plowing and put some seed in the ground, they take hold anew. They will work from the time they can see in the morning as late

"Our people in general have a lot of hope," continued Mr. Reid. "They say, 'We have the best land in the this make them gives in the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation—the Arkansas Farm Credit Company—organized at Mr. Hoover's suggesting the special loan corporation and the special loan corporation at the special loan corpora

this make them give up."

At this point O. B. Martin, who was with Mr. Reid at the time, spoke up. Mr. Martin, who is in charge of the extension work of the United States Department of Agriculture in the southern states, had just arrived to work with Mr. Reid on the Arkansas

"A, big plantation man has more agility than usual in dealing with reverses," Mr. Martin remarked. "They've seen 10-cent cotton and they've seen 40-cent cotton. "Yes," added Mr. Reid, "and they've seen 10-cent cotton when they expected 40-cent cotton."

"Cotton looks like 17 cents now," observed Mr. Martin. "That encour-

ages them a bit."

Better, more standardized, agricultural products are going to come out of Arkansas, both of the agricultural extension men agreed. Phillips County an Example

"Phillips County is an example of that," said Mr. Reid. "Before the flood Phillips County was growing a number of varieties of cotton. It VV a garden enthusiast from the will grow all delfos this year. Delfos southland was attracted by a plant is the seed best suited to that secis the seed best suited to that sec-tion. were new to her. In every It will probably work out the same way with chickens and pigs in explained how she had got the seed, Phillips County, added Mr. Martin. and, after telling its name, has "It remains to be seen how much added: "I call it 'the Friendship the Red Cross can do," he said. Flower, and I like to think that "They are just getting up against the live-stock question. They will the same happy friendly feeling certainly not bring in all scrubs and mongrels—they will bring in good chickens. And good hogs and cows, too. So much was lost in that area that a sufficient supply of good stock will amount to a reformation.

Serious Problem Hopeful as many may be, Arkansas faces a very serious problem in rehabilitating itself agriculturally, and the experts made no attempt to gloss over the difficulties. Mr. Reid, who is the assistant director of the state agricultural extension service,

located at the capital, said: "One third of the agricultural land of the State, the most fertile we have, deep black rich bottom land, was overflowed. Most of it is plantation area. Thirty counties were partially damaged. Our situa-tion is not like that of Mississippi where the loss was spread over 10 counties which were all overflowed. Here the floods caught a third or a juarter of a county, running over its

and SHOES

tion, was given new impetus by the relaxation of conditions on which the federal intermediate credit bank at Washington will accept its paper. "This system will take practically ail our paper under proper conditions," said Mr. Couch, the state food communications chairman "We tions," said Mr. Couch, the state flood commission chairman. "We have got to surround its loans with some degree of business, but they will not be gilt-edged. The company comes in where the Red Cross ends and where ordinary banking chan-

and where ordinary banking chan-nels won't function because the credit is too weak.

"Loans will be limited largely to the crops. Possibly they may be made on a basis of \$5 an acre for cotton and \$3 for corn. Where one

can't make a crop there is no need to make a loan. "We are hoping to use a good deal lumber mills, logging equipment, stave mills and roads. Quite a few will be able to get a regular loan

Red Cross Deals With Homes "The home end of rehabilitation comes through the Red Cross. In the towns the damage to churches, schools and other social and community buildings can be largely taken care of. In the rural districts we hope the Red Cross will make some provision later. Where it is impossible to plant crops, endeavor on the railroads, in the sawmills or elsewhere.

Cheerful news comes from the office of the State Department of Public Instruction that public school damage is not so great as might have been thought. H. A. Dawson, statistician of the department, said "With what the Red Cross does and the intermediate credit bank we expect to get the cabins up this year. We are hoping through the Red Cross and the intermediate credit that in most cases the flooded schools could be restored by cleaning and that not many had been washed bank to get chickens, pigs and milk cows sufficient to re-establish the people. If this is possible we shall get back this fall much as we were. away. Revenue to run the school away. Revenue to run the schools next year is already in, as the taxes out of which hext year's school expenses will be paid were collected shortly before the flood.

Under a new constitutional amendment Arkansas' communities have just been given their first chance to raise their school taxes, and the That means the supply of considerable resources and the help of every

agency. If not we shall be set back four or five years."

The special loan corporation—the raise their school taxes, and the scheduled elections came a few weeks ago, right on the heels of the flood. Clarendon, one of the principal towns in the State to be flooded, and one which was badly flooded, voted a rise from 12 mills to 18 mills. Other communities did likewise. "It speaks well for them to vote a 50 per cent increase under such dire circum-stances," observed Mr. Dawson. "It stances, observed Mr. Dawson. It means they want to do more for the schools whether they do anything else or not. The best schools in the State are in the inundated section; there is more wealth there."

Road damage also is not so large as might have been anticipated. G. Hunter Sykes, state highway engineer, estimated it at \$1,500,000. The State has just sold \$13,000,000 worth of bonds in opening of a big road

WORLD POLITICS ARE DISCUSSED BY LIBRARIANS

Sovietism and Fascism Described as Challenge to Social Life

TORONTO, Ont., June 22 (Special) The challenge that Sovietism and Fascism presents to British and American social life was strongly emphasized by W. F. Russell, dean of Teachers' College, Columbia University when suching at evening of our extra credit resources from versity, when speaking at evening the national chamber of commerce session of American Library Associtor business and industries, such as session of american Library Association, at Convocation Hall here last night, this being the second day of the American Library Association's forty-ninth annual meeting.

"Russia is in the hands of a small reason of the meeting of the second of the secon

group of men who are ruling as they say for the benefit of the proletariat. The people are too hungry, too inex perienced and too ignorant to know what is good for them," he said. "In China where the Soviet system of government is sweeping its way and in the same way in Italy and Spain where Fascism has been established we again find a severe challenge to

our own social life."

Proceeding the speaker said that
the answer to the question of what perpetuated democracy or caused it to fail was to be found in three propositions: material prosperity, general education and local govern-

"We have extraordinary material prosperity, particularly in the United States and Canada due to our vast natural resources. We have vast widespread education. From Britain we have inherited and perpetuated our local government. Our educational system so far as we are concerned is mostly a matter of local government."

was encountered in the freight rates necessary in returning books.

D. E. Cameron, librarian of the University of Edmonton, explained that the university had organized 400 traveling libraries extending over the Province.

Mary J. L. Black, librarian of the public library at Fort William, presided "We have extraordinary material

Matter of Local Government
Proceeding Dean Russell said "in
the United States if we analyze our
local government we find more than
half dealing with schools and if we
include libraries whose trustees and
whose support are essentially a
matter of local government, we have
a clear majority of local government." In conclusion the speaker
said: "The dream of the ages, the
hope and aspirations of men for
countless generations that the time
might sometime come when personal
property would be secure, when man
would be entitled to the fruits of his
labor and when the race of life
would be run from an even start,
that dream depends upon the material prosperity, widespread education and the local government which
is mainly the work of the school and
the library. In consequence, you
librarians and we school teachers Matter of Local Government the library. In consequence, you librarians and we school teachers have been handed the torch which lights up this hope and dream of all mankind. Let us see that we are faithful to this trust."

International Understanding Col. J. M. Mitchell, secretary of the Carnegie Trust of the United Kingdom and member of the govern-ment committee on public libraries, in the course of an interesting adfunction in the cause of interna-tional understanding. It happened that through errors and oversights of fie press, he stated, and through the misguiding of some unauthor-ized individuals, they got the wrong ideas of what was actually happen ing. He felt that in library co-operation they had a powerful instrument for the removing of mis-

understanding.

Andrews, Mgr. committee of international rela-tions, University of Michigan gen-eral library, being unable to be present, his paper was read by a former president of the Library As-sociation. Dr. George H. Locke, presided over a large gathering. One of the most important of the morning sessions was the meeting.

morning sessions was the meeting in Osgoode Hall of the American Association of Law Libraries. The members of this association were welcomed by Mr. Justice W. R. Rid-dell. who, in his address, referred to the important factor of law li braries in the maintenance of the rule of law among nations as well as individuals.

Law Librarians and Lawyers Mrs. Mary E. Frankhouser, of the Michigan State Library at Lansing, spoke of the close association of inerests between law librarians and

awyers.
One of the difficulties in the way of a world-wide survey of law li-braries was the language question, said Frederick C. Hicks, of Columbia University law library in the course of an address on "The Fu-ture Legal Bibliography."

Other speakers were: John T. Fitzpatrick, of the New York State Library at Albany; J. J. Daley, of the Law Society of Upper Canada, who pointed out that the society's library, founded in 1800, now consisted of 70,300 volumes, and Lucille Vernon of New York. One of the interesting subjects

brought up at the meeting of the Canadian library extension section was the problem of extending the advantages of traveling libraries to the newly settled districts of the Dominion. Considerable difficulty was encountered in the freight rates

FLOOD CLEAN-UP CAMPAIGN BEGUN ON MISSISSIPPI

Mr. Hoover Hopes to Move Debris Within a Month-Loss Is Estimated

Hoover, Secretary of Commerce, for every county affected by the Mis-sissippi flood, the effort to last over 30 days and to be followed by a continuation campaign of 18 months.

Mr. Hoover, who starts back at
once for a further 10-day tour of the affected area, explains that the clean-up will be financed by \$500,000 from Red Cross flood relief funds. The cost of the continuation cam-paign is estimated at \$1,100,000 and will be financed from other relief agencies. The whole plan, Mr. Hoover announces, goes into action at once and will be one of the largest clean-

ups ever attempted.

Experiments in Community Service, Beaches Branch, Toronto

Toronto, Ont.

Special Correspondence

OME interesting experiments of community service are being carried out in Beaches Branch of the Toronto Public Library.

At first sight its field does not seem one for experimentation. That suburb of Toronto known as "The suburb of Toronto known as "The test of the conclusion was the establishment of the Library Drama League, whose aim is to present

At first sight its field does not seem one for experimentation. That suburb of Toronto known as "The Beaches" lies some four miles from the heart of the city and had its inestablishment of the Library Drama League, whose alm is to present the heart of the city and had its interption in three groups or settlements of summer cottages. Kew, Scarborough and Balmy beaches. It testains much of its original character. It is a suburb of homes. Its inhabitants are, for the most part, young or middle-aged married people. It has no foreigners, no very poor and few really wealthy-families. Sport—aquatic and otherwises—still forms one of its chief interests. still forms one of its chief interests. There are stores of the suburban type and elementary schools, but there are no factories and there is

The library, which is situated in the corner of Kew Gardens, is built of red brick. In honor of the tercentenary of Shakespeare, in which year it was built, it is an adaptation from the plans of the old grammar school of Stratford-on-Avon. Its main room, that of adult circulation, has tall windows, open-timbered ceilings and a great welcoming fireplace with oak settles. Its walls are lined with books, and scattered throughout the room are small reading tables and comfortable chairs. Below this is the boys' and girls' room, also possessed of sunshine and fireplace, of rows of bright-colored books and friezes of pictures. The staff consists of one children's librarian with

adult circulation. A few years ago its circulation consisted for the most part of books of popular fiction. It had as little connection with the life of the com-munity as had the cinema theater next door, and it was much less popular. Today it exerts a real in-fluence not only in the cultural but in the social and business life of the

Peaches or Potatoes

peaches or potatoes," he says, "as long as they are good peaches or good potatoes,"

Just whether Dr. Locke considers

The Book Lovers' Evenings owe their inception to a different impetus. It was noticed that books which might have given pleasure were often returned to the shelves

Beaches an orchard or a potato patch he does not state, but the librarian in charge has been allowed to follow pretty much her own bent, and has received the consistent enproof of the pudding before eating couragement and assistance of the chief librarian;

As a result of this policy, Beaches Library has come to be known throughout the city for its complete material on both the technique and history of art. Regarding Canadian art and artists it has probably the most comprehensive data extant. Annual picture exhibitions are arranged for the library by prominent Toronto artists, and, in connection with these, some of the best talks on the subject of art which have been delivered in the city. This art interest was initiated by the presence of a picture borrowed by the librarian and hung at the end of the room above the great fireplace. People were attracted by its beauty and piqued by its divergence from tradition. They made comments, and because of this increasing in-terest the first of the annual exhi-bitions was arranged. These "art nights" proved so popular that the library instituted a series of monthlong exhibitions of small pictures which might prove of practical interest to people who were beginning to have a sufficient income to invest

in works of art.

They also showed that Beaches perhaps because of its nearness to the country and the beauty of its sparkling lake and wooded ravines, has more than its share of Toronto's artist citizens, and this proved an incentive to the collecting of material of value in their work.

terial of value in their work.

Another art experiment has been the two "craft nights," one devoted to bookbinding, the other to the making of block prints. On these evenings, which were open to all who were interested, but which had a disappointingly small attendance, each of those present, under the direction of the supervisor of manual training for the city and two of the teachers from the city technical schools, actually bound his own small volume and achieved his own block print.

Library Drama League

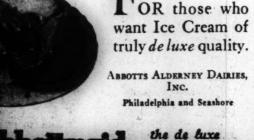

Library Drama League Dramatic art also claims its share of library attention. As before stated, the library has as near neighbor a cinema theatre. It did not take the library staff long to discover that whenever a cinema was based on a book that book immediately circu-

Peaches or Potatoes

This is due primarily to the city's chief librarian, Dr. George H. Locke, who practices the policy of allowing his assistants to develop their particular branch of work along the lines of their individual interests and potentialities.

"I don't care whether they grow peaches or potatoes." he says, "as long as they are good peaches or good potatoes."

Tufts College Closes a Fine Baseball Campaign

Wins 16 Games Out of 20, While Pitcher Stanley O Robinson Scores Victories Over Yale and Harvard -Success of Team Tribute to Coach Nash

TUFTS COLLEGE, Mass., June 22 (Special)—Another baseball campaign for the Tufts College varsity team has come and gone, and prospects for another successful season on the diamond loom brightly in spite of the fact that five of the veterans of this year's team have graduated.

Two figures stood out this season in Two figures stood out this season in connection with the team and they were Coach Kenneth L. Nash and Stanley O. Robinson '27 of Winthrop, the Brown and Blue's left-handed pitching ace. Nash, who was a St. Louis Cardinal and Cleveland infelder back in 1914 and 1912, respectively, has coached eight teams at Tufts with more than average success, and it seems that he can take most any nine boys and make a ball team out of them.

nine boys and make a ball team out of them.

This is why followers are so certain that Nash will have another good team next year. At present he has the nucleus of such a squad with the entire outfield and Capt.-elect Fred L. Kennedy '28 and A. J. Leonardi '29 in the Infield, and Myron Dorenbaum '28 behind the bat. A. P. Phillips '29, a utility infielder, and N. S. Ingalls '29, catcher, are expected to be available.

The five veterans who graduated last Monday were Wallace B. Strathdee, Charles Kelley, Fred Fulton, captain of the 1927 team and who was out almost the entire season; W. M. out almost the 1927 team and who was out almost the entire season; W. M. Burgess and Robinson. Kennedy acted as captain while Fulton was out of the game.

the game.

The Jumbos went through a schedule of 19 regular varsity games and lost only four. The outside game in which Tutts participated was with the Tech Beavers, the unofficial team of the Massachusetts Institute of Technology. Tufts won this contest 13 to 7. The outstanding victories of Tutts this season were scored over Yale University at two Haven, Dartmuth College at Tufts Oval, and Harvard University at the 1927 season on April 14 with a 16-to-3 victory over Lowell Textle Schoool at Lowell, M. R. Bowker '28, pitching. Then Northeasterm University was entertained at the oval, Robinson pitching an 8-to-4 win. E. W. Smith '28, Tufts third-string boxman, is credited with a 13-to-3 victory over Sound in the Robinson took the box in the next game with Boston University at the Oval. The B. U. team hit him for six safe hits, while the Tufts nine collected 10 off Donald Macdonald of B. U. Pitcher Robinson had perfect control at all times and won a hard-fought-for game, 4 to 2.

Then the Medford collegians joure game. The Jumbos went through a sched-

Special from Monitor Bureau NEW YORK, June 22 - Harris Horder, the Australian star, is today

In the race for third and fourth oints, William Spencer defeated

those who are to battle for the York and American round titles.

Miss Dorothy D. Smith of Newton-Center, holder of the women's United States and eastern championship titles, will not compete in the eastern this year so there is sure to be a splendid battle for her title.

Owing to the fact that Cyrus E. Dallin, the famous sculptor, has offered a new medal for the various winners, the competition is sure to bring out the best of shooting. The medal is a copy of his famous Indian statue at Arlington, Mass.

COSTELLO GETS HOLE-IN-ONE

MASSAPEQUA, L. I., June 22—Patrick
Costello, the club professional, made a
hole in one on the 217-yard ninth hole
of the Biltmore Shores Golf and Country Club, here, yesterday. This was the
first time a hole in one had been made
on the course in the 5 years of its existtime a hole in one had been made
on the course in the 5 years of its existtime.

Special from Monitor Rureau
CHICAGO, June 22—To start the second and final day of the annual women's western invitation golf tournament at Indian Hill Golf Club, north of here, today, Mrs. Lee W. Mida of Butterfield Country Club started with an advantage of one stroke with a score of 90 against 91 for Miss Virginia Ingram of Sunset Ridge Golf Club. There were 123 contenders in yesterday's round. Mrs. Mida encountered traps on her first three holes, but steadied and brought in 44 for the first nine. Two short approaches and a missed putt contributed to her 46 on the return.

By the Associated Press

Buenos Aires, June 22

A MATCH between Jose R.
Capablanca of Cuba and Alexander Alekhine, Russia, for the world's chess championship has been definitely set for September in Buenos Aires. Capablanca is

champion at the present time.

The Argentine Chess Club, under whose auspices the contest is to be held, has sent messages to both players accepting their terms and has made a deposit of \$3500 as a guarantee. ******

York went down to defeat here yesterday at the hands of the Boston Braves, 7 to 5. Hogan's hitting won the game for the Braves. In the ninth inning, with the Braves behind by two runs, Hogan hit a home run into the upper right field stands and started the Braves on a rally which tied the score and forced the game into extra innings. In the tenth, he stepped to the plate again with a man on base and knocked another home run, this time into the upper left field stands. Had this been all the hitting he did, it would have been quite enough to satisfy President E. E. Fuchs, who was watching in the stands, but Hogan also contributed two singles. Two Glants, Mueller and Rousch, had perfect days at bat, each making three hits, and each having a home run to his credit. The Braves were outhit, 13 hits to 14. Hornsby contributed three. The score:

Former British Open Champion Leads in Match With

within striking distance of the leaders when play was resumed yesterday morning.

Jolly and Thompson were eliminated in this morning's 18 holes and Black, by coming home in 33, two under partook the lead with a stroke advantage over Rimmer, while Havers and Kay were tied for third place. This quartet apparently had the first prize between them: but gradually three of them were eliminated, while Havers came through with a sparkling 72, two strokes less than the final round of Charles A. Whitcombe, and even with Eric Bannister of Winnipeg.

Black lost the main prize by his failure to negotiate the ninth hole on both rounds. In the morning he lost several valuable strokes, but in the afternoon the hole cost him eight strokes and although he had a 77 for the round, it sent him back to second place. Rimmer faltered after five holes in the afternoon and rapidly dropped out of the contention while Kay lost a ball on the eleventh fairway and although he finally found it, the hunt and delay unsteadled him for several holes.

The British professionals fared much.

holes.

HAWAII PLANS ARE MATURING FOR BIG MEET

World's Foremost Amateur Swimmers Expected at A. A. U. Championships

HILO, Hawaii (Special Correspondence)—Extensive plans for the men's national outdoor swimming championship meet of the A. A. U., which will be the outstanding water event of the United States this year, are being made in Hawaii. At least 15 swimmers and two officials from the mainland, the fastest swimmers and best divers of Japan, Australia and Hawaii, and many other competitors are expected for the event which will be held Aug. 24, 25, 26 and 27 in Honolulu. George D. Center, president of the Hawaiian Association of the A. A. U., who is in charge of arrangements, is enthusiastic over the prospects for a record meet. peets for a record meet.

peets for a record meet.

Prominent swimmers who are expected from the mainland include Paul Wyatt, Allegheny Mountain Association; Walter Spence, Metropolitan Association; Pete Des Jardines, Florida Association; Harry Glancy, Philadelphia; Walter Laufer, Cincinnati Y. M. C. A.; George H. Kojak, New York; D. C. Fall, California; Michael Reilly, California; George Ross, New York, best mile swimmer, mer available; best \$80 yard swimmer, to be selected, and a five-man team to be selected by the Illinois Athletic Club. According to present arrangements proposed by John T. Taylor, to be selected by the Illinois Athletic Club. According to present arrangements proposed by John T. Taylor, chairman of the National Swimming Committee, the expenses of these men would be borne by the fund of \$7500 raised by the Hawaii A. A. U. Officials proposed by Taylor are Dr. F. M. D'Eliscu, Philadelphia referee, and Ernest M. Smith, San Francisco, judge of diving.

From Japan will come K. Takaishl, champion aprint swimmer, and several others to be selected. Australia will be represented by Andrew Charlton and others.

Hawaii will be represented by several stars, who will be determined

Warren D. Kealoha, back-stroke star, Samuel Kahanamoku, sprint swimmer, William Kirschbaum, breaststroke, and Gay Harris, medley swimmer and back-stroke expert. It will not be surprising if the Hawaii A. A. U. comes out with high honors, for not only are there many stars here, but all are training faithfully under the direction of Mr. Center.

Alberto Zorrilla, noted Argentine swimmer, will enter the meet, ft is announced, and a four-man team will also be sent by the Hollywood Athletic Club. Clarence Pinkston, champion high and fancy diver, is also expected to enter.

ideal in Hawali, and several records are expected to fall during the four days of the meet. The entire territory is enthusiastic over the coming meet, and capacity crowds are expected to be on hand for every event

COACH FRED F. MITCHELL again showed his baseball experience when he put F. B. Cutts '28 in to relieve J. N. Barbee '28 in the Yale-Harvard game Tuesday, which the Crimson won, 10 to 6. Cutts bettered his performance of a year ago, when he held Yale scoreless for the innings he pitched. Last year Cutts was rushed into both Yale games and saved the Crimson from impending defeat each time. But Yale scored on him once in the first game. Incidentally Barbee was one of the pitchers that Cutts relieved a year ago. There are reasons to believe that NOACH FRED F. MITCHELL again There are reasons to believe that aniey O. Robinson '27 of Tufts College ill play baseball in the New England ague this summer, possibly with Manester.

while the big-league seouts are looking around for so much college material this year they might give R. F. Vaughan 23 of Yale more than a passing glance. His hitting has been prominent. He made three hits, including a triple in the first Harvard game. And his playing a brilliant in the infield.

dous smash, clearing the left center-field fence with plenty of room to spare. And yet. Gehrig seemed only to chop the ball rather than hit it with a full whole-body motion.

possible of the plant of the pall rather than hit it with a full whole body motion.

Lazerri is fully as fine a shortstop as he is a second baseman. His strong throwing arm is seen to better advantage at short than at second, however.

Another faculty that Coach Mitchell of Harvard seems to possess is the knowledge of just what time to take his pitchers out and just the right shifts to make in his lineup at just the right shifts to make in the value at a shift and the right shifts to make in the value at a shift and the right shifts to make in the value at a shift and the right shifts to make in the value at a shift and the righ

as they did last year. Mitchell has now triumphed five times against Yale in as many games.

That double steal Yale tried to complete in the sixth must have been watched by Coach Mitchell of Harvard with both approval and disapproval. As an advocator of straight, sound baseball in college play, he probably would not have tried the double steal at that time, when leading by only two runs as Yale was; but he did not disapprove Yale's using it, for it failed to go through. A good, clean hit might have brought two more runs in had the team waited.

Bratche, former Red Sox, outfielder, hit a home run with two men on bases for Toronto against Rochester Tuesday. If the present Harvard-Yale series is free from any trick or out of the ordinary plays on the part of the Harvard nine, fans should not be surprised. Coach Mitchell said before the season opened that he would resort to sound, straight haseball methods with only occasional resort to the surprise plays when the accore allowed. "One run in a college game is seldom worth taking a chance for," Mitchell said. "The right use of surprise plays is of course legitimate haseball, but where a college team is concerned, they are so seldom completed successfully that I find it quite a good plan practically to ignore them completed.

SIR ROBERT BORDEN LECTURES AT OXFORD

Special from Monitor Bureau LONDON—Sir Robert Borden, for-ier Prime Minister of Canada, has een delivering interesting historical ddresses in his new capacity as a cturer at Oxford. In one of them he touched upon e position of the Canadian Minister Washington, which he claimed did

EAST ORANGE, N. J.

not involve any departure from the idea of the diplomatic unity of the British Commonwealth. This Commonwealth, he said, had not only held but developed its unity in the day of trial. It would do so agity if there should be need. If its unity could not be maintained, what hope was there for the League of Nations, for which in some measure it might serve as an exemplar? In this aspect the British Commonwealth owed a duty not only to the people of its free nations, but also to the world.

OXFORD MAN WINS

Special from Monitor Bureau turer at the London School of Eco-nomics, who gained an open scholar-"I am absolutely in agreement

The person elected travels round the world for at least a year, "free from all professional pursuits, with the object of making an unprejudiced survey of various civilizations and of acquiring a more generous and philosophic outlook on human life."

The selection was made in the Speaker's Library at the House of Commons, and later Lord Hewart, the Lord Chief Justice, a trustee, the Lord Chief Justice, a trustee, gave a dinner in honor of Mr. Kahn at the Reform Club. Among those present were Lord Cave, Lord Balfour, Lord Blanesburgh, Sir CooperPerry, Dr. Franklin Sibly and Dr. P. J. Port, secretary to the trustees.

SWIMMERS REACH GERMANTOWN While the big-league seouts are looking around for so much college material this year they might give R. F. Vaughart 28 of Yale more than a passing glance. His hitting has been prominent. He made three hits, including a triple in the first Harvard game. And his playing is brilliant in the infield.

Although Gehrig of the Yankees does not take the long full swing at the ball that Ruth does, some of his hits have gone fully as far as the home-run champion's this year. The one Gehrig hit at Fenway Park, Tuesday, was a tremendous smash, clearing the left center-field.

DYER LEADS THE FIELD

singles, for high-hitting honors for the Crimson.

Last year it was a six-run raily in the sixth inning that clinched the first game for the Crimson This year it was a fiverun raily in the seventh.

By winning the first game of the Yale By winning the first game of the Yale clean against the Elis. In 1916 when he was coach, the Crimson won both games, as they did last year. Mitchell has now triumphed five times against Yale in as many games.

LETTERS FOR TENNIS PLAYERS WILLIAMSTOWN, Mass., June 22—For the first time in recent years the williams College tennis team, which has enjoyed an exceptional season, will compete in the annual national intercollegate tournament, which will be held at Haverford, Pa., June 27. Capt. C. B. Marsh, Wolf. Banks and Chase will reward for the excellent showing, members of the team will receive straight letters instead of the customary tennis Williams College tennis team, which has enjoyed an exceptional season, will compete in the annual national intercollegiate tournament, which will be held at Haverford, Pa., June 27. Capt. C. B. Marsh, Wolf. Banks and Chase will compose the Purple team. As a further reward for the excellent showing, members of the team will receive straight letters instead of the customary tennis

not involve any departure from the EFFORT TO MAKE WOMEN'S RIGHTS A WORLD ISSUE

PARIS (Special Correspondence)

Messages from France for the
convention of the National Woman's Party to be held at Colorado Springs on July 7 are transmitted through Merger of Three Factions to the correspondent of The Christian Science Monitor by Anita Pullitzer, the national secretary, who has been in Paris and in other parts of Europe forwarding the work of the

The chief aim of the party is, of course, to secure equal rights for men and women, especially in the industrial sphere, where discrimi-nation is often made on the grounds of sex. The members insist on equal pay and equal conditions, and they would have not only the adformer Home Minister in the Wakatsuki Cabinet. The new party is called
the Rikken Minseito, or Constitutional Democratic Party, and has a
majority in the Lower House.

The Minseito's announced platform is utterly opposed to that of
the Kenseikal, from which it has
drawn the majority of its members.
It advocates free economic competition, provided such competition is in
conformity to the general welfare of
the Nation. "Production," it says,
"should be regulated with an eye to
social justice. The party is opposed

ments proposed by John T. Taylor, chairman of the National Swimming Committee, the expenses of these men would be borne by the fund of \$7500 raised by the Hawaii A. A. U. Officials proposed by Taylor are Dr. F. M. D'Eliscu, Philadelphia referee, and Ernest M. Smith, San Francisco, judge of diving.

From Japan will come K. Takaishi, champion sprint swimmer, and several others to be selected. Australia will be represented by Andrew Charlton and others.

Hawaii will be represented by several stars, who will be determined at the tryouts to be held here June 24, 25, 26 and 27. Among those who are expected to make the team are Warren D. Kealoha, back-stroke star, Samuel Kahanamoku, sprint swimmer. William Kirschbaum, breast, stroke, and Gay Harris, medley swimmer and back-stroke expert. It will not be surprising if the Hawaii A. A. U. comes out with high honors, for not only are there many stars here, but all are training faithfully under the direction of Mr. Center.

Alberto Zorrilla, noted Argentine swimmer, will enter the meet, M. is sunnounced, and a four-man team will announced, and a four-man team will announced, and a four-man team will announced, and a four-man team will sannounced, and a four-man team will served to the same.

men and women, many of the women's associations are at pres-ORD MAN WINS

trade handled. New hangars have been built and accommodation increased. Ralls have been laid down in many directions in order that the wagons may be brought alongside the warehouses. Special arrangements have been made to facilitate embarkation and disembarkation operations, analyting a lowering of the emoarkation and disemparkation op-erations, enabling a lowering of the cost. Three distinct wharves will be laid out, one to be exclusively re-served for Serbian commerce, the second for coasting trade, and the third to serve commerce in general. The Serbian merchants who have

to do with the zone do not conceal their satisfaction at the facilities they have enjoyed in trading with the outside world through the Greek zone, and it is hoped that the ru-mors recently circulated to the effect that Serbia is desirous of using Sa-loniki as the main outlet and inlet

TRADE EXHIBITS PUSHED IN INDIA

BOMBAY (Special Correspondence) -The inauguration of a series of agricultural and industrial exhibitions is among the notable activities wide variety of contemplated activities of the department of industries of the department of industries of oil-driven vessels between Derby and England, the stocking of 25,000 covering the past year's operations. At such exhibitions, the exhibits on view have included the chief indige-nous products of the Province, toether with textile machinery, and

gether with textile machinery, and demonstrations of textile processes. The working of agricultural machinery has been explained in detail through the vernacular to the agriculturists who visited the shows. Attempts have also been made to demonstrate through the same medium the results of up-to-date tanning processes. The holding of exhibitions of this character involves considerable expenditure but that, in W. J. Armandy. hibitions of this character involves considerable expenditure but that, in the opinion of the director of the industries department, is amply justifled by their educative value.

fied by their educative value.

The report urges that there is abundant scope for the opening of cotton and spinning and weaving mills, particularly on the east coast.

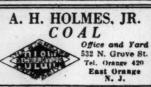

A certain amount of useful work has been done through peripatetic reasting parties who give demonstrates. weaving parties, who give demon-strations of improved appliances to local weavers, while the textile in-stitute has afforded practical instruction in weaving and textile manufacture generally to those of the educated classes who have decided to adopt such pursuits as a means of livelihood. These men receive in-struction in designing, preparation, weaving, dyeing, block-printing, ho-siery, as well as in sericultural operations, and they are, the report says, in every way superior to the professional casts was superior to the professional caste weavers in point of education, training, outlook and

No little confidence is therefore reposed by the authorities in this class for the revival of the weaving industry, for it is believed that these men, who have been trained in the institute, assisted by their superior education and knowledge of techniques will be able to evaporate and nique, will be able to organize small weaving factories with modest capi-tal and, as practical weavers, to run FOREIGN TRADE tal and, as practical weavers, to run their own business entirely, without being dependent in any way what ever on the "caste" weavers.

BIG COPPER RESERVE

STANDERTON, S. Af. (Special racial misunderstandings, has been well demonstrated by the report So far, over £20,000,000 worth of copper has been taken out of the zone.

Although the zone only began to function in the autumn of 1925, the commercial commodities brought in during 1926 by 116 boats represent 320,121 tons and another 125,470 tons have been brought by self-production. The spot where the old Governor, simon van der Stel, first dug copcommercial commodities brought in the date 1685, cut out on the side of the excavation, is still to be seen.

Parliamentary elections. The numbers are practically the same as previously. No fewer than 47 out of 50 members of the old Parliament have been returned. The electorates were almost equally divided into supporters and opponents of the Labor Government. OF AUSTRALIA TO BE DISCUSSED

Premiers to Confer on Plan to Transfer Territory to to Commonwealth

PERTH, W. Aus. (Special Correspondence)-In its attempts to organize some great plan to develop and settle the idle North West Province—a costly inactivity as well as a menace to national safety—the Western Australian Government is meeting with many difficulties.

So far as the proposed resump-

tion of a portion of the country by the Commonwealth authorities is concerned, the Premier, P. Collier, has now stated that further nego tiations cannot very well be carried on by correspondence, and he in-tends to see the Prime Minister, Stanley M. Bruce, shortly to discuss the question. A proposal by the Federal Government to take over all the land above the twentieth parallel Industrial Shows Instituted by Madras to Encourage

Manufacturers

He land above the twenter parallel instead of above the twenty-sixth parallel, as originally proposed, will be dealt with in the conversations between the State and the Commonwealth leaders.

The Premier announces that an amplitious development scheme

ambitious development scheme launched by the Australian Chilled Meat & Food Supplies, Ltd., a com-pany formed by English capitalists, has been abandoned. The pros-pectus of the company embraced a and England, the stocking of 25,000 square miles of country, and the establishment of chilling and freezing works at Derby. It is believed that the scheme has fallen through because the advisers of the Imperial Government, which had un-dertaken to guarantee the first issue

Western Australia to Queensland. in distant parts.

The rapid growth of population in Western Australia, and particularly in the capital, Perth, have awakened the Town Planning Associa-tion to the increasing urgency of town planning schemes. At the recent annual meeting it was pointed out that the central business sections of Perth were too long east and west. Each area, it was con-tended, contained about 8½ acres against 2% acres in New York More streets are required running north and south. In the course of a few years, when the present old two-story buildings are replaced by those of five stories, the long, narrow streets will be so congested that transportation will be difficult.

After an exciting contest, the Labor Government has been re-

State Insurance for Wage NEGRO WORKER Earners Is Proposed by **Royal Commission** STANDERTON, South Africa (Spe-

cial Correspondence)—Clements Ka-dalie, an African native, and secre-Special from Monitor Bureau union, has been attending the international labor congress at Genera in an unofficial capacity in MELBOURNE, Vic.—Important recommendations regarding the establishment in Australia of a scheme of national insurance applying to all the interests of the I. C. U. During June he proposes to lec-ture in America under the auspices persons receiving wages or salaries are contained in the final report of of certain Negro Socialist organi-zations In July he will undertake a speaking tour in England under the Royal Commission on National Insurance. The commission recomthe auspices of the International Labor Party. The following month he is to attend Paris for the annual mends the establishment of both compulsory and voluntary participa-tions in the scheme, the compulsory provisions to apply to all wage and gathering of delegates of the Inter-national Federation of Trade Unions salary earners aged more than 19 years, while the voluntary provisions shall be open to all workers on their years, while the voluntary provisions shall be open to all workers on their own account and to the proprietors of small businesses.

It is expected by the commission that considerable difficulty would be experienced by operating a national and after that will give a series of

Much surprise has been caused in Labor circles by the decision of Judge Dwyer in the Western Aus-tralian arbitration court fixing a 48-

hour week for a certain union. The objection raised by counsel for the union was that, when a militant

branch of workers stopped work, and created industrial chaos, it secured its demands, whereas when a union went into court peacefully it was

treated differently. It was also argued that a 44-hour week was a reform in keeping with the trend of the times, that the worker was en-

BOOK REVIEWS AND LITERARY NEWS

In Defense of Small Towns sophical gestures, he asks earth and aky to yield the secret of their meaning for him.

The Harvest of a Quiet Eye, by Odell little community is an epitome of his Shepard. Boston: Houghton Mimin Company. \$3. _____ for as he remarks, "Connecticut was

for as he remarks, "Connecticut was originally—and in several important respects is still—merely an assemblage of little towns"; and does he not prepare us for the pilgrimage with him by his opening sketch on simple chronicle of a man, weary of the great city, who sought 'fresh author's the little town, man and navects and pastures pays' along the type have formed a truce nay, partthe great city, who sought 'fresh author; the little town, man and nature and pastures new along the anes and byways of the New England countryside." In outward form it follows the innumerable "Rambles" to earth. Even longer will the reader dwell in—" and "Highways and Byways," being the record ostensibly of a two being the record ostensibly of a two the searth of this beauty of earth untouched by peared on the Home Forum. For the search of the s iand countryside. In outward form to find the innumerable "Rambles in—" and "Highways and Byways," being the record ostensibly of a two weeks' exploring expedition across man, as it mirrors itself in almost experimental properties. the northern boundary of Connecticut. But Mr. Shepard is no conventional rebel against "the great city."

He does not represent himself as a through the conventional rebel against "the great city."

He does not represent himself as a through the conventional rebel against "the great city."

He does not represent himself as a through the conventional rebel against "the great city."

He does not represent himself as a through the convention to the convention of the convention to the convention of the convention o

an's paradise." For: "There is no better example in the world of the law of compensation than that provided by the roads of New England considered from the rambler's point of view. The highway, to be sure, is obnoxious to his foot, eye, ear, and nose, but the highway cannot be everywhere. It sucks into its channel nearly all the traffic that once flowed along a dozen others, and therefore, while it grows 'bet-ter' year by year, a dozen roads that run in the same general direction are growing delightfully worse. . . golden, blurred and blotted by swift shadows, than in one of these old ways 'paved with afternoon' that

comes from no particular place and goes by roundabout routes no-"An Abandoned Road"

And "thinking of these things," he puts his impressions of the moment into a poem on "An Abandoned Down from the windy and sun-washed

hill,
Down through the maple glade,
Down where the aspen leaf is still,
It sinks to a moted shade:
And there, stretched out in glad release,
It lapses, blurred and blind,
Into the infinite lonely peace
Of things gone out of mind.

Many are "the things gone out mind" which Mr. Shepard brings back out of the twilight of Connectiback out of the twilight of Connecti-cut's past, as he lingers along her forgotten ways. "Round the Corner of Time" (the title of one of his 13 divisions) clambering about old cellar holes, he sees "that the peopl who had lived here had been skilful and honest builders. A hundred years had not tilted their chimneys or shaken the Cyclopean masonry of their foundations. Fire and vegeta-tion and damp had eaten all but the stones they laid, but these, we thought, would remain to report well of them for a thousand years to come. Evidently they were strong men and women who lived here, and such as take strong hold on life,

striking deep roots into the earth."
With sympathetic skill he conjured up the voices of the villagers "wh once made this hillside ring with laughter and with song" and who, he persuades us, "were a joyous, vigorous, full-blooded lot, lovers of life, lovers of earth." With fine ption he shows us also, from he meets—in the motionless group on the porch of the village store, "Smittle," virtually a serf on the remote farm, in "the philosophers of the barn floor." But most of all

only essay and the most sustained a new circle of readers who must writing in the book, if only to dispel the memory of Spoon River and Gopher Prairie. In a sense, moreover, Mr. Shepard's picture of the quiet dignity and loveliness of the simple matter to follow the expo-

"The Three Kingdoms," and now in

only an accessory to her sturdiness, her courage, her keen if narrow in-

tellect, her gift of loving. Those who saw Mary Hansyke bearing herself proudly along the ways of

Danesacre saw sweet surprised eyes, heavy dark hair, brilliant color, a small but immensely digni-

color, a small but immensely uight-fied person. Those who knew her respected her honesty and determi-nation whether they liked her or

not. A few knew and loved her

in her marriages, in her grappling with the immensities of ship-build-

Lyric Beauty

Some of these meanings he has happily rendered into the 12 or more poems which illustrate in lyric beauty the progress of scenes and moods which he records. It would be a pleasure to quote from a num-ber of the stanzas; we can here only mention by title the two poetic in-teriudes which seem most notable, "I Shall Remember" and "The Flock

several years Mr. Shepard's weekly essays have lent that page no little He does not represent himself as a fugitive from a clamorous civilization. If he seeks lanes and byways it is not so much to escape as to find—to discover nature for himself, to reflect, and to integrate his own experience.

Only against gasoline does he protest. But quite charmingly he points out the paradox that "the automobile has made New England a pedestrian's paradise."

For: "There is to the control of the pictural the universal. Not sentimental, not work and the universal. Not sentimental, not of more permanent form between the covers of this volume, they must find an even wider circle of readers. But why so drab and sober a bind—of Hudson and Hardy, and as they are leading? Doubtless the stout buckram was chosen to meet the demands of hard usage among those who will glean after the author in forest and the universal. Not sentimental, not of more permanent form between the covers of this volume, they must find an even wider circle of readers. But why so drab and sober a bind—of the covers of this volume, they must find an even wider circle of readers. But why so drab and sober a bind—of the universal. Not sentimental, not round to literary topics that have been much discussed but upon which Mr. Noyes has something new that was chosen to meet the demands of hard usage among those who will glean after the author in forest and leading the national inter-relations just mentioned and to literary topics that have been much discussed but upon which Mr. Noyes has something new the covers of this volume, they must find an even wider circle of readers. But why so drab and sober a bind—and may be any time to the covers of this volume, they must find an even wider circle of readers. But why so drab and sober a bind—and any the covers of this volume, they must find an even wider circle of readers. But why so drab and sober a bind—and any the points of the covers of this volume, they must have been much discussed but upon the covers of this volume, they must have been much discussed but upon which Mr. Noves has somet

Explaining Proust

HE French original of this book perception he shows us also, from the beginning to the end of the "simple chronicle," how this human published for so long a time published for so long a time that it is somewhat surprising to rehe meets—in the motionless group the motionless group the meets—in the motionless group the meets—in the motionless group the meets—in the motionless group the motionless group the meets—in the meets—in the motionless group the meets—in the me ceive this not altogether adequate known: his upbringing, his entrance store, on the ophers thought that most people interested limited but select reputation as an remote farm, in the philosophers of the barn floor." But most of all in Proust would have sufficient as a mellowing, pervasive force in those communities which he celebrates in the most original section and interpretation unnecessary. But those communities which he cele-brates in the most original section of the volume, "In Praise of Little Towns."

One would dwell upon this, the

translation will likewise be thoroughly revised.

The Franch original of this book the precise meaning obscured in the

> piece. Even yet all the book has not been published; and when Pierre-Quint wrote his commentary several volumes were yet to appear. Doubt-less when the final installment— Past Time Found Again"-appears the commentator will revise and complete his work. When that time comes it is to be hoped that this

tion finished, the reader is plunged into a detailed, thoughtful and subtle account of Proust's style and methods of structure. A good deal has to be said of Proust's finesse in catch-ing the fleeting shades and grada-tions of sensibility, and of the way in which the characters in his great novel evolve. In all this there is not much originality, for these matters have occupied the attention of all critics of Proust. Much fresher is Pierre-Quint's picture of "The Universe of Marcel Proust": the salons of the Quartier St. Germain in which it is a woman.

Miss Jameson clothes Mary in the days that saw the change from sails to steam, from wood to fron, only an accessory to her sturdiness, and fron to steel. If it were not that the sails to steam, from the days that saw the change from sails to steam, from wood to fron, and fron to steel. If it were not that growth of the ship-building industry in the days that saw the change from sails to steam, from wood to iron, and iron to steel. If it were not that when Mary is on hand one can have eyes only for her, the romance of ship-building itself would take all the ready? attention.

Mr. Noyes and America

New Essays and American Impressions, being "The Crags," written as a by Alfred Noyes. New York: Henry Horatian ode, in memory of Thomas Bailey Aldrich.

THERE is a pleasing manliness about these essays that redeems their occasional triteness of subject and indulgence in platitude. Indeed their author's refusal to accept any view because it happens to e current or to reject any opinion because it happens to be old is refreshing. Writing as he does, as an Englishman who has lived for years in America, he finds many opportunities to set both Englishmen and Americans right regarding each

other. The collection consists of essays The collection consists of essays of two types, relating respectively to the national inter-relations just mentioned and to literary topics that have been much discussed but upon which Mr. Noyes has something new

Inclusion of a book in this list does not necessarily indicate that it has the indorsement of The Chris-tian Science Monitor.

Wide Experience

The group dealing with the mutual understandings of Englishmen and Americans are certainly based upon an unusually wide as well as intimate experience. In his preface the author says that his impressions are derived not only from his soare derived, not only from his so-journ at Princeton, but from memo-ries of "more than a hundred and fifty education institutions and more than six hundred towns and cities."

Many visitors to the United States, he explains, "break into print after a very short sojourn. They miss everything but the obvious externalities, and even then misunderstand

them. There is a deliberate attempt in this book to set mere externali-ties aside and to lay stress on more essential things. . . The 'typical' is all too often as untrue to life as the 'composite photograph' and, though the chapters on America dwell on individual and particular characteristics, they do this as a deliberate answer to the loose generalizations which have become so common in recent years, on both sides of the Atlantic, with regard to all foreign and merely marks of a character man, merely marks of a character composite photograph' and, though

The thought that underlies these essays, then, is that national differences are too often the result of a satirical personification of the worst national traits. John Bull and Uncle Sam are useful symbols for the caricaturist, but they originated in the same are useful symbols for the caricaturist, but they originated in the same are useful symbols for the caricaturist, but they originated in the same are useful symbols for the caricaturist, but they originated in the same are useful symbols for the caricaturists. eighteenth century and have little interpretive value for the student of national characteristics today. They

throats, and financiers in most of the great cities of Europe and North America; and there is far more difference between the bishop and the cut-throat in any single nation than between bishops themselves anywhere in the world."

tions. More original if less valuable, slightest importance either as letters the actor Macready, one of the close are the literary essays. He does not hesitate to attack once more the or as revelations of character. Anyvexed question of Shakespeare's one who has read the previously colsonnets, and his exposition of their lected letters will know that Dickens origin and meaning is very sensible, making one hope that he will some time develop it more fully. He poet, his theory being that they are pathetic, or in the expression of a the receptacle of many fugitive thoughts and phrasings for which Shakespeare found no place in the early poems and plays. It is plausible theory, for which he finds considerable evidence.

The receptacle of many fugitive personal theory.

The Unpublished Letters of Charles Dickens to Mark Lemon, edited by Walter Dexter. London: Halton & Truscott Smith. 525 copies only. 42s. net.

NTHUSIASM for Dickens could hardly go further than the production of this handsome and theater or assistants in theatrical

> Early Effusions The energy which we know Dick-

ens put into his public readings durapproaches them as a poet, inter-evidence from time to time in a vivid ing the last phase of his career had ested in the "work-shop" of another sketch of an incident humorous or been devoted intermittently but been devoted intermittently, but often still more lavishly to the production of plays, mostly in private theatricals. Some of his earliest effusions indeed became skeletons in the famous author's cupboard. While the original "Pickwick" was still appearing Dickens wrote "4 comic burletta," "The Strange Genatieman," which was produced at the St. James's Theater in 1836, and was followed by an "operatic burletta," "The Village Coquettes," by the same author. Another "comic burletta," "Is She His Wife?" was produced next, and all three pieces seem to have enjoyed a measure of

seem to have enjoyed a measure of

success, which may have been due to the musical elemnt.

Dickens had no illusions as to the ens seems to have been compelled to go on devising plays or producing. We see him at these occupations in many letters as well as in the numerous play bills he compiled with the help of friends like Lemon.

Playbills Reproduced Writing from Broadstairs in August, 1847, Mark Lemon, he says (and his remarks give a notion of the character of this correspondence):

Write about!—Lord love you, I have a million of theatrical things to write about to you, if I had time and pens. Forster will have told you by this of my notion of the book. I hope you'll like it. I think it will be funny.

From Shepherd's Bush, in May, 1848:

Do you think you could manage before we meet tomorrow to get from the Musical Director of the Haymarket (whom I don't know) a note of the overtures to correct and send back the Bill-proofs to-morrow (they are to be brought to Miss Kelly's), and should like, for completeness' sake, to put the Music in.

About half the letters printed here contain interesting information or remarks, and with Dr. Dexter's narrative notes, the reproductions of playbills and the excellent facsimiles of several letters, a most agreeable book for Dickensians has resulted. If the view of Forster and also of Mr. Dexter, that Dickens but for a trifling chance might have become a great actor instead of a great writer, is not proved (as Mr-Dexter thinks), one does close this volume at last with the conviction that Dickens needed, more than

love of music is to utter a para-dox to those who associate the poet with irregular meters, jagged, uneuphonious rimes and sand large groups of people, each arrived at music we know little-and yet the potency of the song can easily be imagined. How the sullen oppressiveness of the air during a thundershower. in that terrible scene be-

The year's at the spring, And day's at the morn, Morning's at seven,
The hillside's dew-pearled,
The lark's on the wing;
The snail's on the thorn,
God's in his heaven— All's right with the world.

Another poem which deals more directly with the power of music is "Saul," based on the Biblical story of David singing before the king, to dispel his melancholy brooding. Here Browning has made a study of varying themes, adapted to the young David, first the simple pastoral airs, known to the sheep and the qualis, and all the little denizens of the field; then the folk songs of the reapers—the help-tunes, and marriage song, and finally the solemn riage song, and finally the solemn intoning of the Levites approaching the altar. From these simpler moods he plunges into songs of joyous ex-ultation:—

Oh, the wild joys of living! the leaping from rock up to rock,
The strong rending of boughs from
the fir-tree—the cool silver

Of the plunge in the pool's living

Yet he must lise even from the praise of "mere living" in the physical sense, however exultant. So he appeals to the love of fame and more. But the poem ascends even higher, the music takes to itself the Philistine may "traffic in his wares."
Browning frequently stresses the power of music. His familiar "Pippa Passes," is a good example, for here the unifying bond between the varied scenes is the little figure of Pippa, the mill-girl on her holiday, and the song is still with the bright-faced shepherd lad, but subdued to a hushed wonder and awe—

In the gathered intensity brought to the gray of the hills;
In the shuddering forest's held
breath; in the sudden windthrills.

It was in a very different mood that Browning wrote the "Toccata of Galuppi," that delicate wistful bit of music, picturing for a brief moment all the sparkle and evanescence of Venice. It, like many of his poems, is in the form of dramatic monologue;

in Browning) in the minor key, emto have invented the small organ known as orchestrion, so in this ing fabricated a marvelous structure received from Raphael as little as the leys. Through verdant tunnels of phrases it, "linger yet thou art so fair"). So he would have "this beautiful building" of sounds perennial:

Meteors, moons, balls of blaze: and they did not pall nor pine, For earth had attained to heaven, there was no more near and

In music he sees something of the miraculous, the finger of God; how else from three sounds can he phrase not a fourth sound, but a star"! For a moment the glory seems to have departed—can it be reclaimed? Ah yes, says Browning; and here we find the poet identifying himself with the musician and reiterating his own fervent belief of the lasting nature

There shall never be one lost good!

GOOD BUYING SUPPORT IS IN EVIDENCE

Continued Ease of Call Money Rates Contributes to Confidence

NEW YORK, June 22 (AP)-Stock prices moved within extremely narrow and irregular limits at the opening of

and irregular limits at the opening of 20 loday's market.

White motors opened fractionally lower at 38, a new 1927 low, and heaviness developed in Sinciair Oil and International Nickel.

Baldwin, General Electric, Hudson Motors and United States Steel common opened slightly higher.

The excellent buying support provided for yesterday's market and the continued ease of call money rates in the face of the record-breaking total of brokers' loans helped to create bullish confidence.

Pools, apparently confident that the market would absorb a large volume of the huge sums to be disbursed next month in the form of dividends and interest, were again actively at work, particularly in the railroad equipment and express shares, early gains in which ran from 1 to nearly 4 points.

American Can and Adams Express both attained new 1927 peak prices.

Some New Peaks

Some New Peaks
Chandler-Cleveland preferred sank
to a new low, and White dropped back
another point to 37 before the end of
the first half hour.
Ralls were rather quiet except for
Western Pacific, which crossed 43 to a
new high record.
Foreign exchanges opened steady,
with demand sterling around \$4.85%,
and French francs around 3.91%
Concurrent strength of the lowpriced carriers, notably the St. Paul,
Soo and Western Pacific issues drew
attention to the improvement in the
position of many of the northwestern
lines, St. Paul preferred touched 32%.
Some large amounts of low-priced
oil shares were turned over, one block
of 35,000 shares of Middle States Oil
changing hands at 3, after which it
reached 3%.

reached 3½.

The renewal rate for call loans was maintained at 4 per cent.

Bonds Quiet Bonds Quiet

Today's bond market was a quiet
effair, with prices moving in small
fractions, and displaying no definite
trend. Estimates in bond circles that
something like \$700,000,000 of the recent issues remain unabsorbed was a
further influence in keeping traders
temporarily out of the market. New
bonds poured into the market this
year have totaled more than \$4,000,000,000. Prospects for the week point
to a comparatively small aggregate
of new material.

Convertible liens agains attracted
moderate attention. International
Telephone 5½s changed hands in fair
volume on a slightly ascending scale,
and Southern Pacific 4s found a number of purchasers fractionally under
yesterday's close.

The foreign group continued reactionary, largely because a substantial
portion of the undigested new issues
are of foreign origin. Estimates place
the amount of such issues still awaiting investors at around \$250,000,000.

Nominal trading occurred in the
Federal Government list, with prices
steady.

EXPECT LOWER EARNINGS FOR MOTOR GROUPS

Nash and Packard to Show Less Profit in Their Quarterly Reports

Within a few weeks two of the larger motor companies—Nash and Packard—will issue reports for the quarter ended May 31. Preliminary estimates expect earnings considerably below the corresponding period of 1926, but somewhat higher than 1925.

The fiscal years of these two companies do not correspond with the calendar year. As the quarterly earnings reports are published somewhat in advance of the majority of other motor companies whose quarters end June 30, they give a good indication of the way business and earnings in the industry have developed.

While it is likely that a large number of other motor producers will have fared no better than Nash or Packard, and indications are that earnings of the industry in general were lower during the second quarter of this year than in 1926, several companies are expected to show net earnings and production records for the period.

Motor sales in the first set months of this year are only slightly below the record of 1926, if Ford's total is excluded. There has been some shifting of business among manufacturers outside of Ford, which accounts for the unevenness of results shown, and reflects keen competition for business. Among the large companies making more impressive showings at present are General Motors, Chrysler and Hudson, which have enjoyed larger sales and larger earnings this year than last.

The preliminary estimate of Nash Motor earnings for the quarter ended May 31 places profits at from \$4,250,000 to \$4,500,000, equal to upward of \$1.50 a share on 2,730,000 shares companied with \$3,925,454, or \$1.43 a share, in the corresponding quarter last year.

For the first six months of its fiscal year, Nash is expected to show earnings of around \$8,500,000, or \$2.25 a

share in the corresponding quarter last year.

For the first six months of its fiscal year, Nash is expected to show earnings of around \$8,500,000. or \$3.25 a share compared with \$10,148,332, or \$3.71 a share in the first six months last year. In the second quarter of 1925 Nash garned \$4,193,150, or \$1.44 a share, and for six months in that year profits were \$7,293,143, or \$2.48 a share, somewhat, below the estimate of this year's results.

The Packard Motor Car Company ended the first nine months of its fiscal year on May 31. It is estimated that earnings in the third quarter were around \$3,250,000, or upward of \$1 a share on 3,000,264 shares.

In the corresponding quarter a year ago the company reported profits of \$5,527,282, equal to \$2,11 a share on \$2,614,722 shares. For nine months Packard's profits are estimated around \$9,250,000, or upward of \$3 a share, compared with \$13,529,640, or \$5,17 a share in the corresponding period of last year.

share in the corresponding period of last year.

In 1925 Packard's profits for the third quarter were \$3,299,384, and for nine months amounted to \$6,254,129, which is below the estimate for the first nine months of this year.

ARCHER DANIELS PROFITS

Archer Daniels Midland net profit for
the nine months ended May 31, 1927, was
\$1,087,066 after _depreciation, federal
taxes, etc., equal, after allowance for
dividend requirement on 7 per cent preferred, to \$4,31 a share of 200,000 no-par
shares of common, comparing with \$1,157,999, or \$4,61 a share, in the similar
period of the previous year. For the
quarter ended May 31, net profit was
\$418,105 after above charges, equal to
\$1.72 a share of common, compared with
\$411,529, or \$1,66 a share, in the like
quarter of 1926.

WORLD LEAD OUTPUT
The world's production of lead in May is calculated at 149,611 tons, including an estimate of 15,000 tons for non-reporting countries, by the American Bureau of Metal Statistics, compared with 153,752 in April. The output for the five months this year was 759,689 tons. The world's output of zinc in May was 125,438 tons, compared with 120,440 in April, and a total of 613,953 for the five months of 1927.

SOFT COAL BUYING LOW

Despite the fact that current production of bituminous is running behind that of a year ago, the buying public, the Coal Age reports, refuses to be alarmed by the labor situation, and feels secure in the belief that present output plus stockpiles, which even now are above the seasonal average, will take care of the fuel requirements of the country. The head of the Lakes alone presents evidence of buying activity.

WOOL MARKET HAS STEADILY FIRMING TREND

Raw Stocks Lighter and Demand for Goods Rising -Prices Abroad Firm

Slowly but surely the wool market is rising. The upward tendency in prices is not sharp, but is none the less cer-

competition for wool in the eastern markets is a bit broader, and the market itself has all the appearances of being entirely sound, with stock of the raw material admittedly in lighter supply than usual, and the demand for the finished product rather keener. The demand for the finished goods is evidently ahead of what it was a year ago this time, and the repeat business for the heavy-weight season is expected to be consummated earlier this year than last, and for a larger yardage. Woolen goods are still in rather keener demand than worsteds.

Price Trend No Longer Down

Price Trend No Longer Down

The spinners and combers have found it difficult to advance prices on their products as yet, but there is no longer the disposition to cut prices which was in evidence a short while back. There is a disposition, also, on the part of the manufacturers to stand more closely together in the matter of a selling policy.

The trade has been interested in the Course of the market in the sale at Sdyney, Aus, this week, where some 24,000 bales are being offered in three days to finish the season.

There are a very few of the autumn shorn wools being offered here but most of the offerings consist of crutchings, the selection from the American buyers' point of view being rather poor. The market, however, was firm with the Continent, Japan and England buying steadily.

As nearly as can be quoted for American styled wools, prices paid were on the equivalent basis of about \$1.05, clean in bond at Boston, for super combing 64s, the first cost in Sydney being 26½ for wools estimated to shrink about 43 per cent.

The Lendon Colonisi Auction Price Trend No Longer Down

Average combing wools were costing about 23½d for 64-70s or \$1.02, clean landed for wools estimated to shrink about 48 per cent. For topmaking wools of the same quality, 22d was paid for wools estimated to shrink about 50 per cent, or \$1, clean basis at Boston.

Interest is keen in the coming Brisbane sales which commence June 28 and last three days, with total offerings of about 50,000 bales, which will include a fairly large proportion of the new clip wools.

the new clip wools.

The opening of the fourth series of London Colonial wool auctions July 5, is the focal point of the wool trade for the next fortnight. It is expected that the market will hold very firm, in view of the closing strength which was manifested at the last series, and

Higher at Liverpool

Higher at Liverpool

The East India sales in Liverpool came to a close last Thursday, with prices very well maintained throughout the list as compared with the opening rates. In fact, the sales gained slightly in strength, and most good descriptions were up fully 5 percent, including the carpet wools. For the best white Vicaneres, as high as 28d. was paid, with best Jorias bringing 22@24d.

Sales this week in Oregon and Idaho show buyers still keen for the staple, with the best French combing clips of fine and fine-medium wool in Oregon costing very close to \$1, clean basis, certainly 98c landed in Boston, while for the really staple clips of fine and fine medium quality, where the wool could be sold in the original bags to good adayntage, the wools are cost-

some cases.

In the bright wool states, there has been a very keen demand for wool, and the buyers have been especially eager for the best fine clips for which and the best fine clips for which eager for the best fine clips for which as high as 40c has been paid in Ohio, this being for the best delaine clips. For the medium clips 35@36c is being

and the buyers have been especially especially especially of the best for the best for the best delaine clips. For the medium clips 36,3626 is being peid.

Local Market Steady

Sales of fine and fine medium French combing wools have been made in the combing wools have been made in the combine wools in the original bags, while good to choice 12 months Texas wools in the original bags, while good to choice 12 months Texas wools in the original bags, while good to choice 12 months Texas wools in the original bags, while good to choice 12 months Texas wools in the original bags, while good to choice 12 months Texas wools in the original bags have brought up to \$1.08, with nothing available at the months of the period of the

LIBERTY BONDS

GERMAN BOND REVALUATION TIME LIMIT

Exchange Must Be Made by June 30, Commissioner Announces

NEW YORK, June 22—The special

NEW YORK, June 22—The special commissioner for revaluation of German Government bonds calls attention to the fact that time limit for exchange of old paper mark government bonds and German state bonds taken over b the Reich for the new loan liquidation debt expires June 30. Bonds not submitted by then will no longer represent a claim against the German Government.

That the time limit is for so-called "new holders," who bought after July 1, 1920. "Old holders," who could show proof of purchase before July 1, 1920, have already had opportunity to convert into the loan liquidation debt, and limit for such conversion has expired. Special consideration is sometimes given late applicants, however.

"Old holders" received special consideration. The revaluation law provided for the issue of loan liquidation debt, drawing certificates, entitled to receive, on being drawn for payment, five times the face value plus interest at 2½ per cent from Jan. 1, 1926, to the end of the year in which drawn.

Special Consideration for Some

The time limit for exchanging paper mark bonds of German cities for revaluation expired Nov. 30 in case of "old holders," but special consideration is given late applicants by some cities. "New holders" of German cities for revaluation expired Nov. 30 in case of "old holders," who have received redemption debt with accompanying drawing certificates in exchange for paper marks bonds purchased before July 1, 1920, are disposing of their value. He emphasizes that drawing certificates through ignorance of their value. He emphasizes that drawing certificates through ignorance of their value. He emphasizes that drawing certificates in exchange for paper marks bonds purchased before July 1, 1920, are disposing of their certificates through ignorance of their value. He emphasizes that drawing certificates are amount, plus 2½ per cent interest from Jan. 1, 1926, to the Special Consideration for Some

The time limit for exchanging paper mark bonds of German cities for revaluation expired Nov. 36 in case of "old holders," but special consideration is given late applicants by some cities. "New holders" of German cities bonds will have opportunity to exchange probably in August.

The special commissioner, at 42 Broadway, has been informed that "old holders" who have received redemption debt with accompanying drawing certificates in exchange for paper marks bonds purchased before July 1, 1920, are disposing of their certificates through ignorance of their value. He emphasizes that drawing certificates through ignorance for ofd possession bonds will be redeemed over a period of 30 years at five times the face amount, plus 2½ per cent interest from Jan. 1, 1926, to the end of the calendar year in which the certificates may be drawn.

For example, a redemption certificate of face amount of 100 marks will be drawn at 500 marks plus interest, and the present market value for such drawing certificates is approximately \$76.

Bond Must Be Sarrendered

Bond Must Be Surrendered Bond Must Be Surrendered
To secure redemption of drawing certificates a loan liquidating debt bond for the same face amount must be surrendered with drawing certificates, and the present market price of \$76 for 100 marks drawing certificates in the example mentioned above includes loan liquidating debt. The German banks are prepared to inform holders of drawing certificates when their numbers have been drawn, provided the securities are deposited with them. For a small charge the National City Bank of New York, depositary for revaluation of safe keeping of securities, also will handle the matter for persons depositing bonds with it.

CHICAGO GRAIN PRICES DECLINE

CHICAGO, June 22 'A")—Unexpected weakness of Liverpool quotations together with better weather over domestic harvest territory, led to an early downturn today in wheat values here.

Liverpool reported increased arrivals, and also told of prospective larger shipments from Argentina next week. Opening at 'Ac to 'Ac off. Chicago wheat underwent a further sag before beginning to react.

Corn started unchanged to 'Ac down and subsequently averaged lower all around. Oats were easy. Provisions tended upward. Opening prices today were: Wheat

—July 1.45% @14.47, Sept. 1.42% @ %;

oats-July 48%, Sept. 48% @ %. GENERAL MOTORS ACCEPTANCE
NEW YORK, June 21 (P)—Application to increase its capital stock from
\$25,000,000 to \$35,000,000 through sale of
100,000 shares of its stock to General
Motors Corporation at a premium price
of \$125 a share has been filed by General Motors Acceptance Corporation
with the state superintendent of banks.
The corporation was formed to finance
wholesale and retail sale of General
Motor products and has granted about
\$2,000,000,000 of credit since its organization in 1919, with total credit
losses of less than one-tenth of one per
cent. Total capital surplus and undivided profits will exceed \$50,000,000
when this new financing is completed.
Capital stock and surplus was \$2,500,000
elght years ago. GENERAL MOTORS ACCEPTANCE

BROTHERHOOD BANK MERGER
CLEVELAND, June 22—Dr. A. A.
Mitten of Philadelphia Tuesday continued negotiations with the Brotherhood of Locomotive Engineers as to an
affiliation with Mitten Management, Inc.,
by which the latter concern would take
over the management of the brotherhood's banks and most of its other
business enterprises. Appearing late
Monday before the engineers convention Mr. Mitten explained details of the
plan as worked out by brotherhood officials and his father, Thomas E. Mitten,
head of the Mitten Company. He was
scheduled to go before the convention
again but it was indicated no decision
on the proposal is expected immediately. BROTHERHOOD BANK MERGER

ALABAMA BANK MERGER ALABAMA BANK MERGER
BIRMINGHAM, June 22 — Effective
July 1, the American Trust & Savings
Bank, founded April 1, 1903, and Traders
National Bank, organized Feb. 17, 1994,
will merge to form American-Traders
National Bank, with resources of about
\$25,000,000. Webb W. Crawford, president of American Trust & Savings, will
be chairman and president of the combined bank, and J. C. Persons, president of Traders National, will become
executive vice-president. Under the
plans of the merger, aggregate capital,
surplus and undivided profits will
amount to \$4,900,000 and deposits \$20,000,000.

AUSTRALIAN INTERNAL LOANS AUSTRALIAN INTERNAL LOANS
MELBOURNE, Aust., June 22—Agreement has been reached between Australian state premiers and Premier Bruce of the Commonwealth whereby the Federal Government will take over all debts of the states and contribute \$37,925,000 as equivalent of payments for the fiscal years 1926-27 toward interest on debts of the states, the Federal Government leaving the states to fund the balance of \$175,075,000 themselves. It is hoped this will raise Australia's credit.

BANGOR & AROOSTOOK BANGOR & AROOSTOOK

Bangor & Aroostook directors voted to
increase the common stock from 77,200
shares of \$50 par to 112,200 shares and
to offer stockholders 29,360 shares at
\$60 a share, the remaining 5540 shares
to be held in the treasury. The initial
dividend on the increased stock will be
paid Oct, 1 at the annual rate of \$3.50,
compared with the present rate of \$3.50.

COMMONWEALTH POWER CO. Commonwealth Power Company de-clared a quarterly dividend of 62½ cents on the common, placing it on an annual basis of 32.50, compared with 32 pre-viously. The regular quarterly dividend of 31.50 was also declared on the pre-ferred. Both dividends are payable Aug. 1 to stock of record July 14.

JUESTIONS

..... and answers

about one of the most important things in life . . . YOUR FINANCIAL SECURITY

Ever increasing thousands of investors are using Brookmire Service to build larger incomes. Many others, however, who can profit to just as great an extent are not now doing so-largely, we feel, because they do not know all the facts concerning Brookmire Service and the organization behind it. To this end we are giving here some facts that we think you, as an investor, will want to know.

If you are interested in protecting your capital and increasing your income consistently, we strongly urge you to consider the following.

1. Is Brookmire advice the same for everyone?

No. It is governed by the circumstances of the individual client. A young man with growing earning power frequently should purchase securities not applicable to an older man. Anyone dependent solely on income from capital requires different types of investments. The requirements of clients differ widely and to each Brookmire Service gives individual consideration.

2. Are Brookmire Bulletins easy for me to understand? They are. In fact they are written with that particular aim in view. Not only are they perfectly clear and non-technical, but also they are definite and to the point. They tell you exactly what to do and when to do it . . . what stocks and bonds to buy and why. They are up to the minute.

3. Do you advise on stocks only?

No. Brookmire Service covers every advantageous form of easily marketable investment, including stocks and bonds.

4. Can I be assured beforehand that I will profit by your advice?

We have documentary records open to inspection which show that clients who have consistently followed our advice have made consistently a far higher than average return on their invested funds. Percentage of profit on outright purchases . . . with no margin nents, and no short sales has been remarkable, so high in fact that we had an independent audit made of every Brookmire recommendation to establish definitely the degree of success clients might expect on the basis of past performance. For five years the audit showed an average return of

5. How much capital should I have to become a client?

This can best be answered by an illustration. One transaction of 100 shares of stock at, for example \$50. a share, that shows a profit of only 2 points more than covers the cost of the Service for a year. Many clients invest \$5,000 to \$10,000 and up. For men with large capital amounts . . . \$50,000 to \$1,000,000 . . . a special and highly individualized service is rendered to cover the necessary ramifications in the investment of such substantial sums.

judgment are obviously greater than your broker's for that is our business, whereas his is primarily the execution of actual orders.

Brookmire Service affords a sound. safe means of confirming or disproving the merit of any recommendations from your broker, your friends, or other sources. Clients are urged always to avail themselves of our services in such instances. In other words, with Brookmire Service you gain protection of your capital.

The above facts are set forth for the information of those intelligent investors who will be interested in an investment service that has proved itself successful for a period of 23 years. The coupon below will bring you the additional data, you may want to determine the value of Brookmire Service to you, as well as a current set of Brookmire Bulletins telling what policy is best now. Make use of this opportunity. Mail this coupon.

6. Does Brookmire Service eliminate my banker or broker?

Since Brookmire Service acts in an advisory capacity only, your orders will go through him as at present. Brookmire's furnishes an authoritative, accurate, unbiased source of advice. Brookmire facilities for arriving at wise investment

COTTON SPINNING ACTIVITY GAINING

WASHINGTON, June 22 (P)-Co on spinning was more active in Mas than in April, the Census Bureau's monthly report today indicated. Active hours for May totaled 9,001, 712,285 or an average of 244 hours per spindle in place, compared with 8,804,-578,361 and 238 for April this year and 7,505,896,215 and 199 for May last

7,505,896,215 and 199 for May last year.
Spinning spindles in play May 31 totaled 36,374,608 of which 32,906,580 were operated at some time during the month, compared with 36,948,340 and 32,892,442 in April this year and 37,700,136 and 32,267,410 in May last year.

year.

The average number of spindles operated during May was 40,205,600 or at 109.0 per cent capacity on a single shift basis compared with 39,070,417 and 105.8 per cent for April this year, and 33,524,928 and 88.9 per cent for May last year.

LONDON STOCK MARKET STEADY

LONDON, June 22 (Special)—Business in stocks today was restricted by new issues which are flooding the markets, but the outlook was brighter. The tone on the whole was steady.

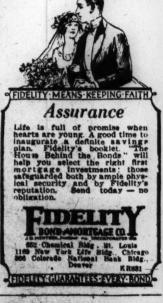

The glit edge section was firm. Home rails were depressed. Coal, wire, steel and shipping shares were dull. Argentine rails were quiet.

Foreign issues were quiet. Mines were irregular. Trading in oils, industrials and textiles was easier.

The boom in artificial silks is subsiding, and bear movements are noted in those issues. Rubbers railled.

Royal Dutch was 31 unchanged; Rio Tintos 38%, of %, and Courtaulds 6 23-32, unchanged.

BOSTON LOAN AWARDED The city treasurer of Boston has awarded to the Old Colony Corporation at 3.50 per cent plus \$37.50 prenium a \$5.00,000 temporary loan dated June 24 and payable Oct. 4.

AMERICAN PIANO EARNINGS

**SEES PERIOD OF PROSPERITY
"The United States has \$12,000,000,000,000 owing to it from foreign nations, and when a country is in that position, it cannot fail to have prosperity for a long time to come," said Daniel Guggenheim out his departure for Europe. "Our prosperity should last for a number of years because interest and in some cases the principal is being repaid us on this huge sum of money. This will cause all lines of industry in the United States to progner and he is a healthy condition."

AMERICAN PIANO EARNINGS
NEW YORK, June 22 (49)—First quarter earnings of American Piano Company show a sharp decline in comparison with the like period of 1926, net
income dropping to 3117.348, or 25 cents
a share on the common, from \$502.936,
or \$9.16 a share. There was a delict of
\$77,924 after preferred and common dividends, in contrast to surplus of \$311.541
a year ago. Net sales for the three
months were \$2,569,270, against \$2,934.834.

New Reflex Horn Idea Is Applied to Loudspeakers had made for testing here. In these days of horn development the length of the tone passage receives much attention, and this is described as an air column so many inches in

Square Tubing With Right Angle Deflectors and Four Divided Paths Novel Feature

ized that the existing loudspeakers were deficient. The majority of these accentuated the high notes and lost the hass almost entirely.

This state of affairs led to the introduction of the cone speaker. This device has swept the country with its popularity. It seems to be rather difficult to make a really good cone however, for the market has been flooded with many inferior products with marked resonant characteristics. That is, certain notes or groups of notes received much more amplification than others, this occurring in a rather "spotty" fashion as one goes up the scale.

Despite the popularity of the cones, and the good ones are excel-

lent music reproducers, the horn advocates felt that this original form of music reproducer had never been fully developed, that in its basic idea it was correct but that the ap-plication of this idea had been very

limited.

This led to a great deal of research being carried out on horn speakers and the result is that sev-eral very good products of this type are now available. One of the great difficulties was the finding of a unit which would give the horn an opportunity to show what it could do. Probably the most popular of the present-day horn units is the Utah. which, with a correct horn, successcompetes with many cone

speakers.

We have been particularly interested lately in a new departure in horn design which has tested out most satisfactorily in our laboratories here. This horn is of the reflex type and while the reflex idea in itself has been in use for some time the horn under consideration is based on a new application of this scheme.

scheme.
The inventor of this horn is Dr. J. S. Bach, Temple Building, To-ronto, Ont. His description of the aims, constructional details and ex-periments conducted, as given to a representative of The Christian Science Monitor shows what care and thought has been applied to the de-

ign work. This is as follows:
"Many of the makers are building cabinets or consoles with two units in them, either two horns or a cone speaker and a horn, so as to secure the low effect of the cone speaker as well as the higher tones of the horn type. One of my aims is to make a speaker that will do

"The principle involved is that the more a tone wave is broken up and reflexed without distortion, the more it is improved in quality and

conceived the idea of a square tube with deflectors at right angles so as to divert the tone waves along four separate paths or planes of ribration. The results were satisfactory, being quite an improvement on the round tubes. The addition of the wings provided four polygonal tubes parallel with the four planes manent Los Angeles company. As of vibration, making four distinct air columns while further gathering the tone waves into four distinct paths, doing away with the jumbled ing the tone waves into four distinct and Earl Askam, tenor, of the Carpaths, doing away with the jumbled delini Opera Company, Milan and effect and resulting in a much purer Fay Bainter's "The Dream Girl"

"The great part of my experimenting was in determining the proper relationship of various parts to each stars. size for the deflection disks, and so on. One would be surprised at the variation in effect with a little variation in size and taper of the tubes, so that the tone will not be either too broad and flat, or on the other hand, too hard and condensed. It has taken work and experimenting the various parts to secure the round mellow tone with as great a range as possible from the full low note to

the high clear tone. "I have just completed the large concert size which brings out power quality especially in the low tones. One feels as if they were coming from under the floor somewhere, they are so deep and round.

laboratory showed an excellent reinforcement of tone, characterized by the marked resonance of the notes in the orchestral scale. Metallic reinforcement is given by the divided brass column, while the lower notes rass column, while the lower are one of the brilliant control of the brilliant collection of the brilliant collection. South America. The latter numwooden panels forming the square ber is very gay and characterized hell of this reflexed horn.

bell of this reflexed horn.

The natural period of the metal is rather high due to size and rigidity. The wooden panels, acting as sound tremely colorful bits of music. ess rigidity. These characteristics are utilized in the production of tone, the two combined giving an program, are: "Indian Summer," by

in commercial form, but Dr. Bach kindly sent us down two models he had made for testing here. In these

length.

The Bach speaker with its ingenious design has a very long air column when it is realized how small When audio amplifiers for radio receivers had been advanced to a point where they were giving excellent quality from the lowest to the highest notes, it was quickly realized that the scients of the speaker is not on the market.

Column when it is realized how small an amount of space it takes. Some 56 inches of air column are obtained, and the whole affair fills an area of only 9½ by 14 inches. We shall be greatly interested in following Dr. Bach's work and the ultimate placing of this speaker on the consumer it is realized how small an amount of space it takes. Some 56 inches of air column are obtained, and the whole affair fills an area of only 9½ by 14 inches. We shall be greatly interested in following Dr. Bach's work and the ultimate placing of this speaker on the consumer.

De Luxe Speaker Model

The Above Photograph Shows the Effect That Can Be Obtained With the Bach

donna of the Stewart Opera Company in the revival of the famous light opera, "The Geisha," in Los Angeles. This move on the part of W. G. Stewart, for five years partner and director of the famous Castle Square Opera Company with Henry W. Savage and thereafter wise in the ways of the theater, effectually sets at rest the peculiar belief prevalent among some managerial circles that radiocasting injures the draw of an

Following "The Geisha," the production schedule calls for such favorites as Gilbert and Sullivan's "Iolanthe" "Plantage of Pensance" more it is improved in quantity. The idea is not new but the application of it is.

"My first experiments were with round tubes but the tone was muffled and jumbled. After consider-"
"Spring Maid' will undoubtedly be able experimentation with various produced soon. As a further indicalengths and dimensions of tubing, I Stewart will attempt to make ar rangements to radiocast each opera from KFI as a means of increasing his box office draw.

Company. Stewart chose Miss Flohri as an artist comparable in ability and reputation with his other two

The jaded musical appetite of radio fans will be whetted on the evening of June 29, when Sol Sax, staff planist at WRAL, will nut on the air a program made up entirely of "first-time" numbers—meaning selections that have never before been heard tions are to be played from the manuscript, never having been published; these are "Air de Ballet" and "An Irish Tune," both by Gustav Klemm, WBAL's program supervisor and one of the best known young composers in the country.

Of particular interest will be the presentation of two stunning Brazilian tangos, now reigning hits in South America, which were recently south America, which were recently sent to WBAL's program supervisor by a personal friend in Rio De Janeiro for their American radio debut. These pieces are "Carioca" and "Batuque" (tango characteristico), both by Ernesto Nazareth, one of the brilliant composers in South America. The

Two other numbers which are enprogram, are: "Indian Summer," by Sturkow-Ryder, and "Barn Dance,"

in the usual cone speaker. This is due, of course, to true reinforcement. As the greatest singers may project their voices to the very depths of an opera house, even on a very soft note, so does this speaker project the tone. Another singer might be singing a much louder mote, but without the overtones, in the difference of the tone without the overtones, in the difference of the tone and the covertones, in the difference of the tone and the covertones, in the difference of the tone and the covertones, in the difference of the tone and the covertones, in the difference of the larger or the world are being primed tion to the support in the northwest." The entire plan is the ory and belief stations within the eyears may be singing a much louder respectively, are current attractions to for dancers via resort diversion and radio. The Hollywood Red-Heads radio, The Hollywood Red-Heads radio radi

I FI has furnished a star to the June 27 to July 10. At the same A opera stages. Virginia Flohri famous rendezvous the Ipana Trou-has been engaged as prima badours, under the direction of Harry badours, under the direction of Harry Lannin, will entertain July 11 to 24, followed by Isham Jones and his orchestra, who remain until Aug. 7. 4 4 4

> These Station WEAF features need will undoubtedly welcome their performances from Atlantic City. August 8 to Sept. 5 brings radio listeners dance programs from Jean Goldkette's Orchestra from the Million-Dollar Pier, where Welch's Minstrels appear from June 20 to Sept. 11. Elliott's Minstrels, on the Steel Pier, and Ted Weems' Dance Orches.

MINNESOTA PLAN DEMANDS CO-OPERATION

Stewart plans to present an ambi- Effort Made to Have WCCO west Institution

> ST. PAUL, Minn. (Special Corre-- Rusiness intere the Twin Cities have been asked by the Washburn-Crosby Company of secretary-treasurer, to undertake the organization and financing of a 5000-watt radio station in St. Paul, and to take over in addition the present equipment of Station WCCO, which the company has operated as a Minneapolis-St. Paul institution assisted by Twin City business men

> for the past three years.
>
> The plan contemplates the distribution of the "blue" chain series of programs sent out by the National Broadcasting Company, of New York, as well as the "red" network programs now received here by remot control.

> It was proposed simultaneously to the Saint Paul Association of Public & Business Affairs and the Minne-apolis Civic & Commerce Association, that the Northwest Broadcasting Company, with an authorized capital of 30,000 shares of cumulative preferred stock and of 1000 shares of common, each with a par value \$10, be formed.

> The Washburn-Crosby Company has suggested three plans, any one of them to become effective Aug. 31, 1927, when the joint operating agree-ment ...nder which the company has been radiocasting will expire.

If the business interests of the two ities decline to undertake the sale Washburn-Crosby Company suggests that a joint nominee of the two com-mercial associations purchase the equipment of WCCO as of Sept. 1

Probably one of the most impressive features of this speaker is the marked diffusion of tone. Placed in even the corner of a room it is difficult, without considerable concentration, to determine the location of the speaker, if one does not use his eyes.

The carrying power of this speaker is decidedly noticeable, this particular feature being more marked than in the usual cone speaker. This is due, of course, to true reinforce
Sturkow-Ryder, and "Barn Dance," by James Rogers. According to the announcement of this feature by Mr. Sax will present this sequent of wcCo as of Sept. 1, 1927, for \$106,000.

Should neither plan find favor, the Washburn-Crosby Company has announced in full-page advertisements appearing in local newspapers that it will sell WCCO Sept. 1, 1927, or as soon thereafter as possible, "in such manner and for such price as it sees fit." The Washburn-Crosby Company with the opening of Atlantic City's summer season, June 11, radio sets and over the world are being primed to two washburn-Crosby Company to the washburn-Crosby Company with the opening of Atlantic City's summer season, June 11, radio sets and over the world are being primed to the announcement of this feature by Mr. Washburn-Crosby Company to a preparing in local newspapers that the washburn-Crosby Company with the washburn-Crosby Company and the washburn-Crosby Company of the washburn-Crosby Company to a course the prime the planting to the announcement of this feature by Mr. Washburn-Crosby Company to a preparing in local newspapers that the washburn-Crosby Company to a course the planting to the announcement of this feature by Mr. Washburn-Crosby Company to a course the planting to the announcement of this feature by Mr. Washburn-Crosby Company to a course the planting to the announcement of t

The entire plan is presented on the theory and belief that radiocasting stations within the next two or three years may be able to become self-supporting. To encourage adoption of its plan, the Washburn Crosby Company has agreed to meet the deficiencies in the operating ex-penses of the new company for the

Drake Road, Scarsdale, N. Y. Tel. 159. reached at the conference of the Australian State Premiers with the Prime Minister, Stanley M. Bruce, on the question of the financial rela-

In the new scheme of Australian financing, the Federal Government will take over all of the debts of the Australian states and contribute £7,-585,000, this sum representing the equivalent of payments for the fiscal year 1926-27 toward the interest on the debts of the states, the Federal Government leaving the states to fund the balance of £25,415,000 themselves. It is hoped that the agreement will result in raising Australia's credit and prestige in the world's money markets.

World's Press BOULEVARD STOP PLAN

Montreal Star: The adoption by the Province of Ontario of what is known as the full stop boulevard plan for provincial highways is a step in the right direction. It compels all automobile drivers crossing what are to be designated as main provincial roads to come to a complete stop before turning into those roads from any intersecting high-

roads from any intersecting highway. The idea is to preserve the main arteries of traffic from the danger of constant collision at crossroads. The principal traffic is upon these main highways, and it is essential that it chould be given the preference.

In many of the principal cities of the United States, and in a number of the states, this plan has been in full operation for some years. It has been advocated by the Canadian Automobile Association for a long time. There can be no two opinions as to the desirability of the plan. No hardship is imposed upon anybody, for the stop protects the driver entering the main highway just as fully as it does the driver upon that highway.

Detroit News: Air progress being what it is, it is doubtless only a matter of months before someone comes through with a work entitled "Around the World on Nine Sandwiches."

PROGRESS London Dally Express: Modern in

highway.

ventions, instead of rendering each other obsolete, continually reinforce one another, falling into rank side by side as joint servants of a com by side as joint servants of a com-mon cause. Many thought that wire-less would render cable telegraphy obsolete, but indications are that wireless, by bringing nations more closely into touch with each other, will increase the demand for those services which the cable alone can perform. The cable and the wire-less have each their limitations, and these very limitations make them complementary to rather than de-structive of each other. complementary to rather than de-structive of each other.

The Cabinet Change in Rumania

ING FERDINAND of Rumania recently took the unusual step—unusual, that is, in a strictly constitutional country, but not unknown in the parliamentary experience of Rumania—of asking General Averescu, the Prime Minister, and his Cabinet to resign. The King advised the formation of a coalition Cabinet, but the General refused to accept the advice, a refusal which resulted in the disagreement that led to his downfall. When about a year and a half ago, Ionel Bratianu, the leader of the Liberal Party, and his Cabinet decided to withdraw from power, General Averescu, as the head of the People's Party, was asked by the King to form a new ministry. He had at the time only about half a dozen representatives of his party in the Parliament; but at the elections, which followed upon its dissolution, he secured a large majority, consisting mostly of

The fate of his administration, therefore, depended upon the good will of a party over which he had no control and whose support he could enjoy only at the behest of Bratianu. The natural conclusion was that the Averescu Cabinet was a makeshift, working under the influence and at the mercy of Bratianu. So long as no divergence of opinion existed between the two men on internal or external policy, things ran smoothly; but the pro-Italian policy of Averescu is said to have displeased Bratianu, who is credited with being a friend of

Liberals

The logical consequence of General Averescu's resignation would have been a Cabinet formed by Bratianu, who is the outstanding statesman of Rumania and whose party is the strongest. But Bratianu, whose administration has not always been in accordance with constitutional methods, is looked upon with disfavor by the other political parties. His accession to power would have been an obstacle to the formation of a coalition Cabinet. The King, therefore, appointed Prince Barbu Stirbey, Bratianu's brother-in-law, head of the new Cabinet, which comprises members of the Liberal, Nationalist and Peasant Parties.

Parliament has been dissolved and the new elections have been fixed for July 7. The press censorship has been lifted, and a manifesto issued by Prince Stirbey promises the establishment of law and order, the maintenance of the dynasty as regulated by the Regency Act and perfectly free and clean elections. Unwilling to leave any play to chance in the free expression of the people's will, Prince Stirbey has removed from office all the prefects and other prominent provincial officials throughout the country and replaced them by men upon whose fidelity and co-operation he can rely. There can be little doubt that the elections will turn out in favor of Stirbey or, what amounts to the same thing, of Bratianu, and that the latter will again come into power.

Outside influence may not have been foreign to the retirement of the pro-Italian Averescu and the reinstatement of the pro-French Bratianu; but the change is not likely to affect radically the foreign policy of Rumania. The change undoubtedly stands in closer connection with home affairs. It is to be hoped that a sense of stability will soon reassert itself in the country.

Home Ideals in South America

OFFSET wrong impressions of homes in the United States, gained from modern novels and motion pictures, the Rio de Janeiro branch of the Young Women's Christian Association is holding a little class in home ideals. The "textbook" for the class is Louisa Alcott's "Little Women," and the "study the following of her New England family through several hundred pages of pranks and effort, wholesome fun and earnest endeavor to become useful members of society.

This informal class has achieved renown through an appeal from the Rio de Janeiro branch to the national headquarters in New York City for "more good stories in English." "Little Women" is the only book of just this kind now available for the young Spanishspeaking girls at the association, and their thorough enjoyment of it after reading modern French novels and seeing the latest United States motion pictures encourages the organization officials to believe that other books of a similar character would receive as warm a welcome.

The effort to interest young South Americans in the cleanest and most wholesome stories of North American homes and families is only a by-product of the program of association activities, but it can be of incalculable benefit to the youthful readers themselves, at the same time helping greatly toward the building up of those understanding individual relationships between nations upon which world peace so largely

The Employee and the Railroad

TT IS in no sense a paternalistic attitude which has led the railroads in the past few years to devote more thought to the welfare and prosperity of their employees. From the standpoint of interesting the men in the company by which they are employed, a number of steps almost unknown a decade ago have been evolved. Employee magazines, for instance, are a part of every railroad organization. In these, while the fact is not always emphasized that the welfare and prosperity of the company are based largely upon the loyalty, energy and economy of its men and women, as well as that the continuity of employment of the latter is predicated largely upon the prosperity of their company, the thought is left with the reader that such is obviously one of the purposes behind them. Social clubs, too, as well as organizations for men and women employed in a special craft, or department, tend also to enthuse the worker in his vocation and to make of him a better employee.

Among the railroads, the employees have been urged to solicit business for their companies. The fact that numerous trains have been discontinued in recent years because of a falling

off in traffic due to motor competition, has made it a particularly easy matter to encourage the train service employees to work for more business, since it is a question of the individual's own employment in some cases, while in others the reduction in travel may cause those now occupying better runs to be demoted to the less desirable tours of duty. Then, also, prizes for economy in fuel consumption, either in the form of cash or the equivalent of a journey to a national convention devoted to such subjects, have been offered locomotive enginemen and firemen, and in other fields of activity similar

rewards have been held out for especially meri-

torious work. That the varied steps taken by the railroads, as well as by the industries whose employees are not spread out over so great an area and who may, therefore, be the better brought into contact with the managements, have been successful is apparent. Greater loyalty, increased economy, better service have resulted. These results have produced increased earnings and hence higher dividends to stockholders, while the men have achieved a greater continuity of employment-denoting the success of the present-day so-called "employee relations" work,

The Farm Problem in Italy

TREMIER MUSSOLINI'S recent declaration that he is a "convinced agriculturist," and that the most important work of the Italian Government in the near future is to restore the balance between city and country populations by breaking up the great estates, here necessary, and providing for a return to the land of nonproducers of the towns and cities, is a recognition of the fundamental that a prosperous agricultural industry must be the basis of national wealth. Since the development of modern industrialism during the past century a great deal of attention has been paid by governments to the welfare of manufacturing industries, for the encouragement of which bounties, subsidies and unduly high protective tariffs have been resorted to in various countries. The result has almost everywhere been the same: a steadily declining rural population, and a constant increase in the numbers of those flocking into the industrial centers. One effect of this unbalanced condition has been the phenomenon of seeming "overproduction" of manufactured goods in all the great industrial nations, with the consequent need for finding new markets, that has led to what is frequently, though erroneously, referred to as "the war for world trade.'

Competent authorities who have studied the character of Italy's millions of acres of unused lands hold that there is no good reason why under proper management the output of farm crops should not be increased many fold. The system of tenant farms, under which the working farmer pays a large percentage of his product to absentee landowners in the cities, is blamed for the backward state of agriculture in many regions. It is contended that, since it is the custom to fix rental charges according to the productivity of the land, there is no inducement for the tenant to work hard, or adopt the new and improved methods and implements used in other countries.

Another defect in existing conditions is alleged to be the crude systems of local taxation, under which the more industrious and efficient farmer is in effect fined for making permanent improvements and bringing his land to a high state of fertility. Human nature being pretty much the same in Italy as elsewhere, it is not surprising that the farmer who knows that a better house or barn, or a swamp or barren hillside reclaimed, will mean a bigger tax bill. hesitates to attract the vigilant eye of the tax assessor. Perhaps Il Duce may have some thoughts about taxation that may work for the encouragement of the efficient farmer.

Tuition Fees in College

TOHN D. ROCKEFELLER JR. suggests that the time has come for the colleges of the United States materially to advance their tuition fees. New methods of financing, with the student bearing a greater part of the cost of his education, are warranted by changed conditions, he says. In view of the fact that Mr. Rockefeller and his father have contributed more funds to the cause of higher education than have come through any other single source, it is reasonable to believe that he has more than a merely casual acquaintance with college finances.

His address, given at the Brown commercement luncheon, is sure to be widely read and studied in college administrative circles. In the past few years there has been an inordinate number of college and university campaigns for huge endowments, mounting in some instances into the many millions of dollars.

The question of where will it all end is a natural one. Alumni have responded generously to the call of the alma mater. Men of wealth have contributed vast sums not only to endowment funds but for the establishment of great memorial institutions. And all the while the tuition fee, the annual sum which the student is asked to pay for the almost unlimited educational facilities which the greater colleges and universities are able to give him, has remained a nominal sum.

To put Mr. Rockefeller's meaning in plainer terms, he practically asks why wealthy and wellto-do parents should expect their sons to be given a college education at a great deal less than cost. Nowadays, he says, the colleges are attracting a great number of students who are attending them for a good time, and social considerations, or to fit themselves to make money. The community-benefit phase of college activity he believes to have been undergoing a visible

shrinkage in the past two or three generations. Mr. Rockefeller does not overlook the young men who are striving for a college education in the face of considerable financial hardship. He believes that future public response will be far greater to appeals for money for the establishment of more scholarships and loan funds than for general endowment. As he was speaking before an endowed university and concerning endowed institutions in general, his remarks have little or no application to the great state

colleges and institutions, though many may find in them an opinion, too, that they should be more largely self-supporting.

As presented by a man of great financial affairs Mr. Rockefeller's suggestions are bound to be given a large amount of serious consideration, while they open up a series of discussions that will prove of notable value to the proper development of college and university finances.

Chicago's Invitation to Royalty

WHEN it is learned that Chicago, in making early preparations for its centennial in 1933, is inviting the three rulers of the Scandinavian countries to be the city's honored guests on that auspicious occasion, who shall say that democracy, in the broadest acceptance of that term, allows ought to stem its onward march?

Visits of royalty to the United States, of course, are no longer a novelty. Nor are Sweden, Norway and Denmark alone among European nations to enjoy democratic rule in line with what Americans enjoy. But in this particular Chicago invitation there seems to be something directly logical in view of what the city's many American-Scandinavians have done for its growth and prosperity.

Should it happen that the Scandinavian monarchs, for state or other reasons, will find it beyond them to accept the Chicago invitation, no doubt scions of the three royal houses will get a no less hearty reception in case they are sent to represent the heads of the respective nations. Democracy's call to democracy ought once more to prove effective and show to the world how international understanding can be fostered when the will to do so is present.

The Scandinavian element in the United States needs no spokesman at this late day to explain what these peoples, whether native born or of Scandinavian descent, have accomplished in the western world. And Chicago's happy inspiration to have Scandinavian royalty partake of the festivities in honor of the one hundredth anniversary of its founding is but another example of how class barriers can be removed for the good of the world's advancement, There is an object lesson in this present extending of hands across the sea that should not be lost, as Chicage makes ready to observe its centenary.

The Need for Air Legislation

ERMANY has been quietly, yet effectively, working for the past few years on a problem which its bound to force itself more and more upon the attention of the world—the question of air legislation. It has at the University of Königsberg an institute solely devoted to the study of aerial law. When it is remembered that Europe has become a network of air lines, and that a crossing by air from New York to Paris or Berlin, or from England to India. Africa or Australia is liable to involve the rights of many countries, the importance of legal rules for air traffic at once becomes apparent."

Even locally there is need for legislation. How low shall an airman be allowed to fly? In England a farmer recently fired at a man who, it was alleged, flew across his fields about 100 feet above the ground. The case was taken to court and the farmer acquitted, but he was warned against using such a means of protest. Then again, is the peace and quiet of the countryside of no concern? The noise of an airplane motor is loud and penetrating, and until means be invented of silencing it effectively, when multiplied, as it is likely to be in future, it would be almost sure to provoke many protests.

But the German institute sees as the greatest immediate need a uniform international law. "The differences in national laws," says Dr. Otto Schreiber, professor of commercial law at Königsberg, "are founded on differences in national characters. Therefore, one must be fa miliar with national characteristics and the differences in law in order to unite and combine them. It is apparent that this work must advance the course of international conciliation. The highest purpose of this institute is to further this work.

By seeking the best legal rules for air transportation, the institute can scarcely avoid furthering international conciliation, for it will help to forestall difficulties which otherwise might arise in connection with the crossing of boundaries, or in connection with the diversity of legislations which might have to be contended with by an airman in passing through many different

The Battle of Colors

nificent mountains and undulating wooded slopes on which a late afternoon sun played light and shadow in constantly varying tones. In the distance Chocorua thrust a rocky nose into a lemon sky; Paugus loomed, a hazy shadow against a sea of blue; while Passaconway arched her back like an angry cat. Waves of ethereal color swept delicately across the horizon, which a few hours be-fore had been washed by heavy rains. Ever and anon light struggled with light, or gave way to violet shadows so that the detail which one would point out to a friend, was lost almost before discovered.

But not alone on mountain and in valley was there conflict, contrast, and clash of color; on the lawn brightly painted balls, each a different color, shot from the impetus behind the mallets, collided with opposing colors, or rolled through hoops of wire toward a common goal. In that game, played on the terraced lawn, was manifested the same struggle for supremacy of color as was witnessed in the kaleidoscopic panorama that stretched and circled around the players, of whom there were eight-hostess, school teachers, government secretaries, college girls, and two writers; but all were reduced to colors.

Colors were paired and worked together in each other's interests as well as in their own. Ladies, otherwise apparently harmless, developed an alarming disposition to hit any ball that gained an advance over its fellows, and it was with manifest enjoyment that they seized every op-portunity to combine against the player who, by good play and well-thought-out strategy, had attained a leading posttion. To take the lead was simply to court attention from other players, which resulted in being displaced to one's disadvantage, but usually with much advantage to others. But through all it was more a struggle of colors than personalities. Miss Blank was lost in her red ball, and the green ball took precedence over its custodian, Mr.

As the game proceeded, and the shadows lengthened, a new factor began to assert itself which became increasingly identified with the black ball. Excitement ran high: each player was straining to his or her utmost, not to play each hoop in sequence, only, but to prevent the leading player—the black ball—from getting through the last two hoops, a feat which would have entitled her to the liberty of a "rover" and which carried with it privileges that would seriously menace the chances of all other colors, except the color with which she was paired.

Nevertheless, there seemed to be something sinister in the success of the black ball. In the first place, black is no color; it is the absence of color, and no one likes to be beaten by a negative factor. There are colors that con-trast and there are those that clash; these are the colors of the air, the sky, and the sea, and however varied, they can be reduced to a common source, a basic color. But black, being a negative-manifestation, sought no co-opera-

Notwithstanding all concerted attacks upon her, the black ball cleared the last two hoops and became a rover. Her partner had four hoops to make and was having a hard time owing to a concentration of balls, all playing for the same position. Black descended into the fray, hitting

THE vista from the croquet lawn was one of mag- | one ball after another, and playing havoc with good positions. But force of numbers told eventually, and one by one the other colors passed through the hoops until nearly all were bound for the two final goals, and among these

was black's partner, yellow.

Across the hills and valleys, the mountains were toning into uniform blues and violets, while the ragged edges stood out in sharp silhouette against the evening sky, which now was shot with dashes of salmon and rose. The colors on earth were waning or deepening into somber hues, and only the skies reflected the glory of the sinking

Balls continued to shoot or roll leisurely across the lawn, but only with difficulty could they now be identified. Three or four of the players gave up the attempt to reach the post, and devoted themselves to handicapping and obstructing the winning pair. Blue and white now claimed the interest, for both were in a favorable position. In an endeavor to prevent black from placing her partner in position, the other players failed to appreciate the progress made by these other colors. With the realization that almost any two colors might win, now, the possible win-ners devoted all their attention to getting through themselves and aiding their partners. Even black abandoned her aggressive tactics and devoted herself to her partner, who was apparently likely to be left behind.

A veil dropped almost suddenly over the mountain; the sky was now a dark cloudy blue with a deep orange glow in the West. The ridges of the mountains stort out clear and black—dense shadows of uniform color, deept where night mists were blotting out the horizon. Shadowy spheres of wood lay strewn about the croquet lawn; wood clattered against wood, but it meant little to the players, for the colors had gone. A ball hit the post; the next player essayed it, and missed by a couple of inches. Others followed, but failed in greater or less degree. Then the red ball hit the post; two partners had come home. Red and green had won a long and strenuous game. But it was dark; all colors agree in the dark. + + +

About us lay a great sweep of night sky, unrelieved by moon or star, against which stood in dim relief a line of ragged black. The horizon was a great black circle. Emerson says: "The eye is the first circle; the horizon which it forms is the second; and throughout nature the primary figure is repeated without end. It is the highest emblem in the cipher of the world." On the grass lay the croquet balls—more circles—idle now, because indistinguishable. And that which had made them distinguishable. able was color; without color their identity was lost

Without color the mountains merge into the sky.

In the village two miles away, a church bell struck the hour. From the dark tree-mass bordering the camp grounds came the mournful cry of the whippoorwill. Suddenly from the camp on the hill burst a chorus of happy laughter. Someone passed with a flashlight and threw a white circle of light in the path just as a girl in a red white circle of light in the path just as a girl in a dress crossed it on her way up the hill. We followed her into the larger circle of light which came from the piasza, and once again colors flashed and clashed as rhythmic music invited dancing feet to trip lightly in more circles.

The World's Great Capitals: The Week in Rome

ROME

ROME

ASCISMO is now so well established in this country
that it really makes little difference if that it really makes little difference if this or that leader of a political group, which some years ago had great influence over a large section of the population, should decide to change his attitude toward the governing party. Political combinations count little in Italy today and the influence of individuals even less, but it is cer-tainly a matter of great satisfaction for Fascism when it is able to point out that it has won the confidence of one or more influential politicians from the opposite side. When these "conversions" are genuine and are not due to any desire on the part of the former adversary to regain his lost position, they are evidently more interesting and sometimes carry with them considerable political weight

A striking instance of change of opinion with regard to Fascist policy has lately been offered by Pio Gardenghi, a well-known revolutionary Socialist who until its suppres sion in November of last year was the editor of the Avanti, the official organ of the Extreme Italian Socialis Party. Signor Gardenghi has written an open letter to the Party. Signor Gardenghi and white an out that in giving editor of the Popolo d'Italia, pointing out that in giving his personal views on Fascism he was not seeking any suphis personal views on Fascism he was not seeking to be adport from the Government nor was he asking to be admitted to the ranks of the Fascist Party. His observations are therefore sincere, and coming as they are from one who until recent times occupied a prominent position in the Socialist Party, they should be kept on record. 4. 4 4

Signor Gardenghi believes that Fascism has accomplished and is accomplishing what were the fundamental ends of Italian Socialism. Apart from the fact that the new men ruling Italy have all sprung from the working classes, it is certain that no government has shown greater care for the proletariat than has the Fascist Government. Indeed, he adds, the working classes are now rightly part of the state; wages have been defended and their level has re-mained virtually unaltered in spite of the efforts and struggles of the plutocratic and industrial classes. Signor Gardenghi is particularly impressed by the moral im-portance and the social significance of the monetary policy of the Fascist Government, and writes: "There can be no longer any doubt. It is enough to ask oneself who is paying the expenses of this daring policy in order to derstand against what social parties it is directed. In view of these facts, as well as of the radical transformation in the public thought, it is absurd to think of a return to power of the old parties and of the old men." The one problem, he concludes, which the Duce has not yet solved that of liberty, but he is confident that Fascism will solve it, and that after a long and new experiment Italy shall have all the true and sound liberties.

+ + + Signor Quirino Majorana, professor of physics at the University of Bologna, has written a letter to the president of the Royal Academy dei Lincei, Italy's leading scientific institution, informing him of his latest researches in wire-less telephony, resulting in a new and most important invention. The professor claims to have discovered a system for the wireless transmission of speech in which invisible ultra-violet rays with a very long wavelength are employed. He has already carried out important and highly satisfactory experiments between Bologna and a place distant about eleven miles. The apparatus consists of a mercury vapor lamp, the light of which is modulated by means of a microphone. Modulated ultra-violet rays are projected in a beam toward the receiving station by means of reflectors. These rays fall at the receiving end on a photo-electric cell of sodium and potassium, which transforms them into electric currents of varying intensity. These currents are first amplified in thermionic valves and being led to a sound reproducing element are transformed into speech. The advantages of Professor Majorana's new device of transmitting voice are that the conversations are carried on with great clearness and in perfect secrecy. The new invention has created great interest in the Italian scientific world.

The first congress of the Confédération Internationale des Sociétés d'Auteurs et Compositeurs Dramatiques (International Confederation of Authors' and Composers' Associations) was recently held in Rome under the chair-manship of the French playwright, M. Robert de Flers. About 150 authors and dramatists representing eighteen

nations gathered in Rome to examine the problem of the standardization of copyright laws upon the model of the Berne conventions, which is to be revised next October. The congress expressed the opinion that the copyright law should be extended to at least fifty years after the passing on of the author. The congress laid down that collaboration should be considered indivisible and that the law should be applied for fifty years after the passing on of the last surviving collaborator. Moreover, authors of music and poetry are to be considered together as collaborators and foreign works should receive the same copyright protection as national works in any country.

The Benefits of Prohibition

To THE CHRISTIAN SCIENCE MONITOR:

Professor Feldman's articles in the Moniton are very timely, and indicate a thorough investigation of the results is read mostly by Christian Scientists, who are not par-takers of alcoholic liquors.

In my daily travels in connection with the conduct of my business, I often enter into a discussion of prohibition. I am surprised to find that almost invariably the law is condemned and the benefits denied. The law is called a total failure, and I am told there is more liquor used than formerly.

There is a wonderful similarity in the arguments used, which make it appear that all the data available comes from the same source. I shall not quote any other arguments, because all of them are familiar to everyone who has ever discussed this question with the man on the street. I would like to know, however, whether it is known among the people who are trying so courageously to sustain this law how little unanimity there is among the people in regard to the actual beneficial results of pro-hibition?

Speaking for myself, I know that prohibition, even as it is now enforced, is enough of a success to be decidedly noticeable in its results. No one who ever traversed the streets of our cities before the law went into effect can deny that there is no comparison between conditions then

It is my belief that there is need of an active campaign to place before the readers of other paper besides the Monitor a correct statement of conditions on this vital question. This is needed to counteract the work being done by those who are so anxious that the people shall have their "liberty."

ARTHUR F. CAPERS. their "liberty." Wellesley, Mass.

Flood Lands Not Yet Being Replanted

To THE CHRISTIAN SCIENCE MONITOR

I hardly know how to express my appreciation of the Montron's interest in the flood, the prominence which you have given to flood news, and your intelligent and sympathetic grasp of the situation.

I want to call your attention to a statement made recently in the Monitors, under the heading, "Flooded Lands Being Replanted." I cannot speak for Arkansas—it is farther north and all Arkansas refugees have left this point—but I was at my home last week, and it is on the north edge of the overflowed district. There the water has fallen approximately four feet, and on account of a little rise in the river the "overflow" is almost at a standstill, that is, it is not falling noticeably, and except for a few high ridges along the streams, where practically all the towns are located, a stranger would have to be told that the water had fallen!

I have talked today to an old settler who has been in a boat the better part of six weeks, and he estimates that less than 10 per cent of the Mississippi overflowed land is now dry. Many farming lands in fact are still from six to twelve feet under water: considerable anxiety is expressed as to the possibilities of any crop at all on the lowlands, and most of the Delta is low.

Loans won't help us much—in many instances they will but make the burden too heavy to be borne.

(MRS.) VIRGINIA I. HELM. Cleveland, Miss.
